

HEART HEALTH REPORT

STOP!

Your cholesterol levels could be absolutely 'perfect' - but still drop dead from a massive heart attack!

Did you know there are four little-known heart-stopping culprits that are more deadly than high cholesterol?

Now, learn how to protect your cardiovascular system and keep your heart strong, and healthy!

Dear Friend,

The medical “experts” are **WRONG**...again!

How else do you explain almost 70% of the people who suffer heart attacks have normal or even ‘perfect’ cholesterol levels???

For years, doctors believed high cholesterol was the sole cause of heart disease and have treated this condition with cholesterol-lowering drugs.

“TAKE MORE DRUGS!!!”

That’s their solution to everything. More drugs. More drugs. More drugs. (It kinda makes you wonder who they’re really working for, huh!)

Last year, 50% of men and 40% of women aged 60 years and older were taking a medication to lower cholesterol!

Yet, more than half of coronary artery surgery is performed on patients with normal or even perfect cholesterol levels!

As you can see, they’re shooting at the **WRONG** target.

It’s true! And, one more thing...

If Cholesterol isn’t the cause, or even the best indicator of future heart problems...**what is?**

Well, research proves there are **four** other **little-known culprits** that are the real cause of heart problems.

These are: Homocysteine, Endothelial Dysfunction, Nitric Oxide, and C-Reactive Protein.

Let’s take a look at these four culprits, one at a time...

Homocysteine: The Deadly Risk Factor That’s Actually EASY To Get Rid Of!

Homocysteine is a toxic byproduct of amino acid metabolism. If you’re healthy, it gets rapidly cleared from your body. But if you’re *not* healthy, homocysteine will *destroy* your body.

It can be compared to the smoke from a fire in your fireplace. Burning wood gives you warmth. But you want the smoke to go up the chimney.

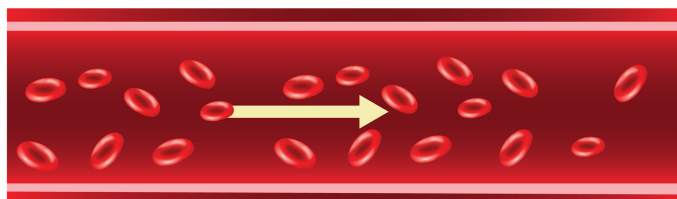

However, if the chimney is blocked by build-up or the damper is closed, the smoke will fill your house and destroy your drapes, your

walls, your ceiling, your furniture - you name it.

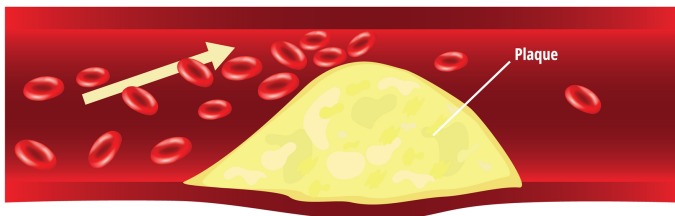

In the same way, if your body's mechanisms for clearing homocysteine from your blood are hampered, the toxic homocysteine will wreak havoc in your body.

I'll tell you in a moment how easy it is to get rid of homocysteine from your body. But first, let's keep looking at what homocysteine does to harm you.

In the case of heart disease, homocysteine injures and irritates the smooth walls of your arteries, creating a rough surface that enables plaque to accumulate. It also causes your blood to thicken, which increases the risk that a clot will form. And it's the clot that can trigger a heart attack.

Healthy artery

Blocked artery

How dangerous is homocysteine?

Well, in recent years, an elevated level of homocysteine has proven to be a **highly significant** risk factor for heart attack and stroke. (And to raise concerns even further, a study by Boston University showed people with elevated levels of homocysteine are at nearly double the risk of major memory loss and other dementias!).

In fact...

Homocysteine Overload Increases Heart Attack Risk by 300%!!!

Data from a study of healthy U.S. physicians with no prior history of heart disease show that highly elevated homocysteine levels were associated with a more than three-fold increase in the risk of heart attack over a five-year period.

This finding was published as part of the Physicians' Health Study that included 14,916 physicians.

This study (and others as well) confirmed elevated homocysteine levels is an independent risk factor for heart disease.

And yet, you never hear about homocysteine - and how to reduce the levels that's in your blood right now.

Most doctors don't routinely check for homocysteine levels! All they seem to do is write you a prescription for cholesterol-lowering drugs.

The second culprit, especially combined with high homocysteine levels, has been shown to

be a major indicator of heart disease:
Endothelial Dysfunction.

You have over 60,000 miles of blood vessels in your body! Your blood vessels could easily circle the globe. They also carry over a million barrels of blood in your lifetime.

Every day, your heart pumps about 1,800 gallons of blood through your blood vessels. Needless to say, you need every square inch of your blood vessels to be healthy in order for you to live!

A key component of healthy blood vessels is the Teflon-like inner lining...the **endothelium**.

When the endothelium is healthy, blood is flowing smoothly. But, what happens when the Teflon-like inner lining no longer works?

You end up with Endothelial Dysfunction. When this happens, blood won't flow as well as it should. It also puts *you at risk* for more blood clots and heart attacks!

Endothelial Dysfunction is a serious problem...yet, when was the last time you've heard anyone talk about it?

And here's the shocking part...

According to The Mayo Clinic, a weight gain of **only nine pounds** can trigger Endothelial Dysfunction!

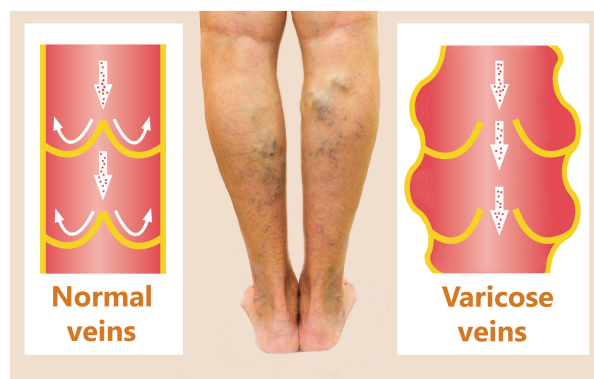

The Miracle Molecule

The third hidden culprit is...low Nitric Oxide.

Nitric Oxide, the molecule that improves heart health, energy levels, and sexual performance.

As you may know, nitric oxide is a little gas molecule produced in our bodies. It impacts the health of every cell, tissue, and organ. In fact, it is so important that the scientist who discovered what it does for us won the Nobel Prize!

And, nitric oxide does a lot for us. Hundreds of studies show that nitric oxide boosts circulation...supports a healthy heart...and improves our sex lives.

So, how does it work?

Nitric oxide signals your blood vessel muscles to relax, allowing blood pressure to ease back to normal. When your blood vessels are relaxed, they widen and that allows blood to flow much easier.

This gives your arteries, capillaries, veins, and heart great circulatory support!

But our natural ability to make nitric oxide drops off as we age and this causes significant problems.

In fact, a limited capacity to make nitric oxide as we age is associated with heart disease, diabetes, and erectile dysfunction.

The fourth culprit has also been shown to be a significant indicator of heart disease: C-reactive protein, or CRP for short.

INFLAMMATION IS FOUND IN ALL DISEASE

CRP is known as a “marker” that gets produced when there’s any inflammation in your body - such as when you suffer an acute injury, an infection, or when you ingest damaging elements such as alcohol, cigarette smoke, air pollution, or toxins.

Chronically elevated levels of CRP can reveal a state of *systemic inflammation* - which means your entire body is in an “irritated” state. And this is what causes many different kinds of lethal diseases.

Basically, inflammation and irritation can lead to clogged arteries and most heart attacks.

The most immediate danger of chronic inflammation is it damages your blood vessels, especially your endothelium.

(Chronic inflammation can result in a heart attack or stroke.)

When you have high homocysteine levels, endothelial dysfunction, and inflammation...

THAT’S where the danger comes in.

You could be a ticking time bomb - even if your “cholesterol” levels are normal.

REMEMBER: Almost 70% of heart attack patients have “normal” cholesterol!!!

But...

You want to give your heart the nutrients it needs - and keep all the blood circulation pathways clear of obstructions.

It's only when your coronary arteries develop clots...and these clots block blood flow to the heart...that you suffer a heart attack.

Or...these clots can break away and go to the brain, causing a lack of oxygen to the brain, resulting in a stroke.

And sometimes, the heart becomes so weak that it doesn't fire when it should (arrhythmia)...or it doesn't fire as strong as it should, which leads to congestive heart failure.

Today, medicine is still looking in the wrong place for the cause of heart disease. They still think it's mostly cholesterol.

But, as I've shown in this report, the real culprits are homocysteine, endothelial dysfunction, low nitric oxide, and inflammation.

It's no wonder why heart disease is still the #1 Killer in this country!!!

In order to protect your heart and blood vessels, you have to address the four key danger areas...

Homocysteine, Endothelial Dysfunction, Nitric Oxide, and Inflammation.

There's **no drug** that directly lowers homocysteine, fixes Endothelial Dysfunction,

raises Nitric Oxide, and reduces inflammation.

But, there is a nutrient that's been used for years to help people feel fantastic again.

That's where our Pine Bark Extract, the key ingredient found in **Navitol** comes in.

Pine Bark Extract has a fascinating history...

Over 500 years ago, a ship and crew led by the famous French explorer, Jacques Cartier, got stuck in ice near Quebec.

As time went on, his crew got deadly ill. They were suffering from scurvy, a serious illness from not getting enough vitamin C.

Fortunately, scurvy isn't a problem anymore. But back then, it was deadly.

If you go a few months without getting enough vitamin C, here's what happens...

The first thing you notice is extreme fatigue and weakness.

After the fatigue, your arms and legs get painful. Your skin is then covered by small red-blue spots. Shortly after, your gums swell up and your teeth fall out.

Next, you develop severe joint pain (caused by bleeding inside the joints). This is followed by shortness of breath and bruising all over.

At this point, left untreated, you end up with jaundice, and fatal heart problems.

All because of not getting enough vitamin C!

Jacques Cartier and his crew were in trouble. But, luckily for them, they crossed paths with a local Indigenous man who taught them a life-saving skill.

He showed them how to make tea using Pine Bark.

Once Jacques Cartier and his crew started drinking the tea, they were cured!

The local indigenous knew Pine Bark contained a vital nutrient they needed to keep them healthy during the long winters.

Today, we know Pine Bark naturally contains vitamin C, which is exactly what the crew needed to cure their scurvy.

But, the vitamin C content of pine bark isn't what makes it a 'miracle' nutrient. It is something else.

Pine Bark Extract is loaded with **polyphenols**.

Polyphenols are bioactive compounds that occur naturally in plant based foods. In fact, plants use them to protect against pathogens and UV radiation.

You most likely heard about the health benefits of red wine, or cocoa. The reason they're touted as healthy is they contain polyphenols.

The problem is, you don't get a lot of polyphenols from red wine or cocoa...at least not enough to be therapeutic.

The same is true with fruits and vegetables. Some of them do contain a decent amount of polyphenols, but again, not enough to be therapeutic.

In fact, you would have to eat 3 pounds of fruits and vegetables to get the polyphenol equivalent of 200mg of our **Pine Bark Extract** (and each **Navitol** capsule contains 350mg of our Pine Bark Extract!).

What makes polyphenols *awesome* and vital to our longevity?

It's their ability to destroy free radicals and protect our cells. Polyphenols have powerful antioxidant properties.

If you peel an apple...it turns a moldy brown colour...that's called *oxidation* - and you see it in your body when free radicals cause premature aging by wrinkling skin,

hardening arteries, stiffening joints or forming cataracts.

The same thing happens when you see paint colour fade on the wall or rubber tires get old and hard...and that's what's happening inside your cells right now.

Your cells constantly suffer the negative effects of free radicals from pollution in the air, food additives, processed foods, vegetable oils, smoking, infections, and even STRESS!

Free radicals can multiply by attacking the mitochondria of your cells - which are the 'batteries' your body needs to make energy (a major reason why many experience fatigue).

Free radicals are actually "mutant" molecules that are missing a part - an electron - so they attack and try and grab one from another healthy molecule.

What's frightening is they keep attacking healthy molecules day in and day out.

Your only choice is to neutralize as many free radicals as possible...especially those in your heart and brain.

Toxins in our foods, cosmetics, cleaners and even tap water can speed up the aging process. It can make you look and feel older than you really are!

Let me cut to the chase...

Polyphenols are critical to our health, but unfortunately...**not all polyphenols are created equal.**

What makes Pine Bark Extract one of the most powerful antioxidants is the type of polyphenols they contain...

Oligomeric Proanthocyanidins (OPCs). These are known as super-polyphenols and much stronger than other antioxidants.

OPCs fight free radicals that cause accelerated aging and are crucial for supporting healthy circulation and strengthening capillaries. And they do this better than any others.

But you need a high concentration of OPCs to get the full benefit!

So the higher the percentage of OPCs you take, the more active ingredient you get AND the more powerful free radical neutralizers you get working in your body.

Pine Bark Extract contains over 80% OPC level - much higher than the 5% many other polyphenols contain.

One **Navitol** capsule contains 350mg of our Pine Bark Extract!

There's a reason people feel fantastic when taking Pine Bark Extract (Navitol).

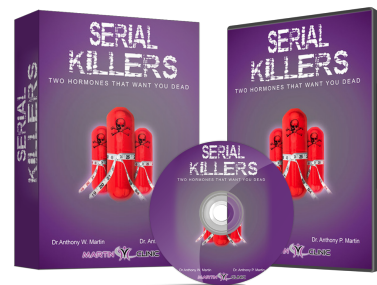

Let me tell you why **now is the BEST time** to try Navitol (our Pine Bark Extract)...

I'll send you **6 FREE gifts** just for trying Navitol.

FREE GIFT #1

When you place your order for a bottle of Navitol for just \$49.99, you'll also receive **FREE instant** access to our low carb video course - the exact system we use in our clinic, **The Serial Killers Revisited program.** This program **normally sells for \$297.**

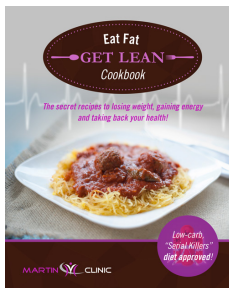

Our weight loss program was created for **anyone who can't seem to lose weight no matter what they do.** The program is designed to work FAST and you can watch the videos on any device or computer.

Our Serial Killers Revisited program incorporates the best parts of low carb eating AND the flexibility to eat carbs using our exclusive carb window technique.

FREE GIFT #2

You'll also receive a FREE digital copy of our best-selling low carb cookbook - **Eat Fat Get Lean** (\$34 Value).

Eat Fat Get Lean Cookbook is loaded with the best low carb breakfast, lunch, supper, and snack recipes we've collected over the years.

Here's a few of the important topics we share in the book...

- You've heard that eating lots of fat in your diet is bad for your waistline, right? Wrong! We'll explain why in this book.
- The best time of day to eat carbohydrates? (chances are, it's not when you think it is)
- How to become a fat burning machine and be literally bursting with energy.
- How to know if you are a "carboholic" (and why it's not your fault).
- 11 diet hacks to help you lose more fat.
- The reason why you should be eating more eggs (no, eating eggs won't raise your cholesterol)
- 5 devastating effects that sugar has on your health and waistline.
- 50% of the population is either Diabetic or Pre-diabetic, these are the steps you can take to prevent this from happening.

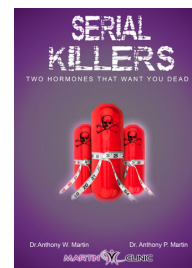

- 6 ways that High Fructose Corn Syrup damages your health. (i.e reason #5...High Fructose Corn Syrup increases uric acid levels in your blood!)

Inside the book, you'll also get...

- Dr. Martin's perfect smoothie recipe.
- Breakfast ideas, including our famous Low Carb Breakfast Burrito, low carb muffin ideas, low carb pancakes and Low carb flax bread.
- Lunch recipes like our red roasted pepper soup, fried zucchini bruschetta with mozzarella and pastrami or corned beef sandwiches.
- Dinner recipes, including our low carb spaghetti, deep dish pizza, pulled pork with sauce and slow cooker Italian soup.

FREE GIFT #3

When you buy from us today, you'll also receive a digital copy of our best selling book...**Serial Killers - Two Hormones That Want You Dead** (\$19.99 value).

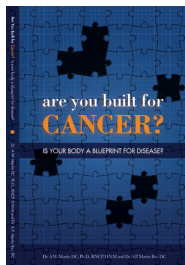

In our clinic we see the devastating effects that insulin and cortisol have on our patients health. These two hormones, when healthy, are essential for life. But, when you have too much insulin or cortisol, they become serial killers.

This book includes our original Serial Killers Diet designed to help people with a broken metabolism shed weight.

FREE GIFT #4

You'll also get a FREE digital copy of our book - **Are You Built For Cancer?** (\$19.99 Value)

After analyzing tens of thousands of patient visits over the years, there are two facts I found to be true...

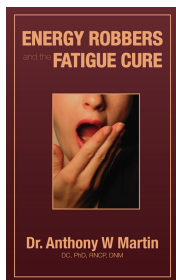

1. You don't go to bed healthy tonight and wake up with a disease tomorrow
2. Your body gives you clues as you move from health towards diseases

There is a definite path between health and disease. Sometimes, the path can be months, other times it may take decades.

In this book, we share with you clues your body gives long before a cancer (or other diseases) diagnosis.

FREE GIFT #5

You'll also receive a digital copy of our best selling book - **Energy Robbers and the Fatigue Cure** (\$19.99 value)

The #1 reason why people visit their doctors is they're tired. There are many

causes of fatigue, some minor, and some more serious.

In this book I share the main causes of fatigue, but more importantly, how to naturally get your energy back.

FREE GIFT #6

There's one more free gift we want to give you when you purchase from us...

A digital copy of our best selling book - **Medical Crisis, Secrets Your Doctor Won't Share With You** (\$19.99 value).

Cars today are loaded with sensors. As soon as one of them detects a problem, the check engine light goes on.

There are many things that can trigger the check engine light, anything from your gas cap not being tightened properly (I know this from experience) to something far more serious - complete engine failure.

Your body works the same way. You have many check engine lights. Low energy is a check engine light. Poor sleep is another.

In this book I share the four gauges that are essential for maintaining good health and how to fix them when they're broken.

In summary, here's everything you get with your purchase of NAVITOL today!

#1 Serial Killers Revisited Program - Our low Carb Video program (\$297 Value)

#2 Eat Fat Get Lean - Best selling digital cookbook (\$34 Value)

#3 Are You Built For Cancer? Ebook (\$19.99 Value)

#4 Medical Crisis - Ebook (\$19.99 Value)

#5 Energy Robbers - Ebook (19.99 Value)

#6 Serial Killers - Two Hormones That Want You Dead - Ebook (\$19.99)

That's over \$400 in FREE gifts just for trying Navitol!

Now that you know all about the power of Pine Bark Extract (Navitol), let me assure you this:

If Navitol isn't for you, you'll get every single penny back. Your decision to try Navitol is entirely risk-free. You are protected by our 100% money-back guarantee.

If you're ever dissatisfied with Navitol, for any reason, just send it back to us within 30 days. Even if you've opened the bottle! Every penny you paid will be promptly returned, with no questions asked.

And as a thank you for trying Navitol, all of the FREE bonuses are your to keep. They're yours whether you return your supply of Navitol or not!
