

DISCOVER THE STRATEGY THAT WILL GET YOU REAL RESULTS WITH YOUR HORMONAL ISSUES

we want to thank you for joining us in this online training that we're doing today. And the purpose of the training is to help you discover the strategy that will get you real results with your hormonal issues. We're going to go through a lot of information today. We're quite excited to share this stuff with you.

YOU ARE IN THE RIGHT PLACE

You can't seem to lose weight no matter what you do.

You're in the right place if you can't seem to lose weight no matter what you do. We see thousands of patients every year in our clinic. It really is a part of a big hormonal issue. Unfortunately, doctors, they miss this big time. "You're eating too much. You're eating at the wrong time", or whatever, and they really don't know what's going on because they're not testing their hormones.

YOU ARE IN THE RIGHT PLACE

You are tired of being tired.

You're also in the right place if you are tired of being tired. If you're out there and just don't have that energy that you used to have, and you're tired of that, then you have definitely come to the right place.

YOU ARE IN THE RIGHT PLACE

You're having a hard time falling asleep, staying asleep or both.

You are also here in the right place if you're having a hard time falling asleep, staying asleep, or, for many of you out there, both. Not only can't you fall asleep, you're having a hard time staying asleep. If that sounds like you, you're definitely in the right place.

YOU ARE IN THE RIGHT PLACE

Your brain seems foggy...

And then you're also in the right place if your brain seems to be foggy. If your brain isn't quite as sharp as it used to be, or it feels like it's foggy, or, as patients will describe to you sometimes, cotton brain ...It shows up a lot of different ways, but basically, their brain is not quite what it used to be ... then you are absolutely in the right place as well.

YOU ARE IN THE RIGHT PLACE

Your hair, skin and nails aren't as healthy as they used to be...

And then also, we get this a lot, and this has to do a lot with hormones. If your hair, skin, and nails aren't as healthy as they used to be, then you are definitely, again

- ▶ Many of you on this training are frustrated...
- ▶ Many of you haven't been able to find answers...
- ▶ Many of you have been told that the problem is "in your head".

Now, we also understand, because we've been doing this for a long time, that many of you on this training are frustrated.

The reason why you're frustrated is because you've been unable to find answers to what's exactly going on with you at this point. Chances are, if you're on this training, that you got some kind of hormonal issue, and you're most likely frustrated by it in the sense that you haven't been able to find either answers, or even if the answers you've been given hasn't helped.

Also, and we hear this so often as well, there are many of you out there that basically, from either your doctor or your friends or family, have been told that the problem is all in your head.

- ▶ Many of you on this training are frustrated...
- ▶ Many of you haven't been able to find answers...
- ▶ Many of you have been told that the problem is "in your head".

Yeah. How often do we hear that?

You know, and it's interesting, right? Because if somebody has, you know, they separate their shoulder or they got a broken leg, you can get it casted up, right? You put your shoulder in a sling. You put your arm in a sling. You're walking around, and people say, "Hey, look at that person is injured." You could tell. But for a lot of you on this online training, that's not necessarily the case. Yeah, you may look tired ...

- ▶ There is a reason why nothing has really worked for you up to this point.
- ▶ Your symptoms indicate something much deeper going on and it's more complicated than your doctor even realizes.
- ▶ That deeper problem must be fixed.

Now, before we get going really, there are four things we want you to understand. These are four things that we have seen over and over again.

These are four truths when it comes to hormones.

- ▶ There is a reason why nothing has really worked for you up to this point.
- ▶ Your symptoms indicate something much deeper going on and it's more complicated than your doctor even realizes.
- ▶ That deeper problem must be fixed.

What we're going to talk about on the online training today is, that deeper problem must be fixed.

Now, before we get going really, there are four things we want you to understand. These are four things that we have seen over and over again.

These are four truths when it comes to hormones.

you are on this training and you are having issues with any of those, it's your hormones. That's what we're going to talk about today.

- ▶ There is a reason why nothing has really worked for you up to this point.
- ▶ Your symptoms indicate something much deeper going on and it's more complicated than your doctor even realizes.
- ▶ That deeper problem must be fixed.

What we're going to talk about on the online training today is, that deeper problem must be fixed.

Now, before we get going really, there are four things we want you to understand. These are four things that we have seen over and over again.

These are four truths when it comes to hormones.

you are on this training and you are having issues with any of those, it's your hormones. That's what we're going to talk about today.

This is why you can't just treat the thyroid, or just treat the adrenals, or just treat the ovaries. The problem is much more complex.

This is why you just can't treat the thyroid, or you just can't treat the adrenals, or you just can't treat the ovaries.

The problem is much more complex than that.

Even though the problem is complex, it can be fixed.

Even though the problem is complex...

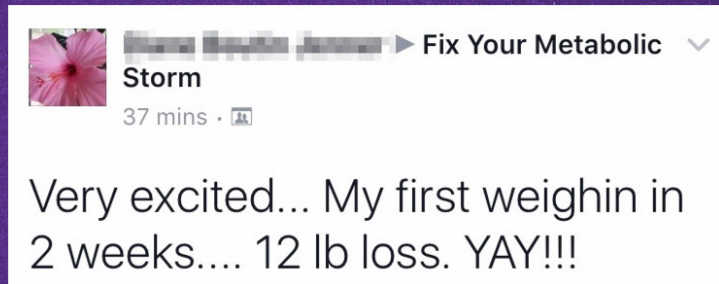

THE MARTIN CLINIC

This is something that we want to stress, that even though the Metabolic Storm is a complicated, deep issue going on, it is very fixable.

It can be fixed.

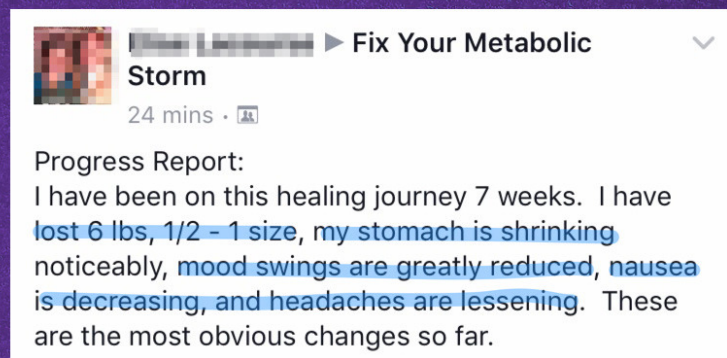

We see this fixed all the time in our clinic.

For example, I'm just going to show you a couple of people that have posted in our private Facebook group for women who are in our program, Fix Your Metabolic Storm program.

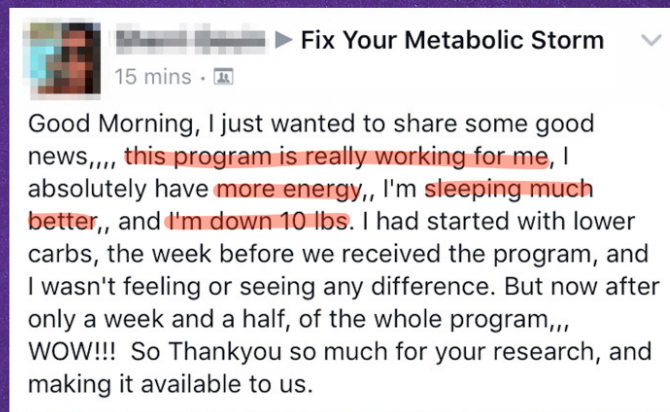

For example, here is somebody here, "Very excited. My first weigh-in in two weeks, down 12 pounds."

Now, you got to remember, these are women who couldn't lose weight for the life of them.

Here's another progress report here from somebody, "I've been on this healing journey for seven weeks. I have lost six pounds, 1/2 to 1 size, my stomach is shrinking noticeably, mood swings are greatly reduced, nausea is decreasing, and headaches are lessening. These are the most obvious changes so far."

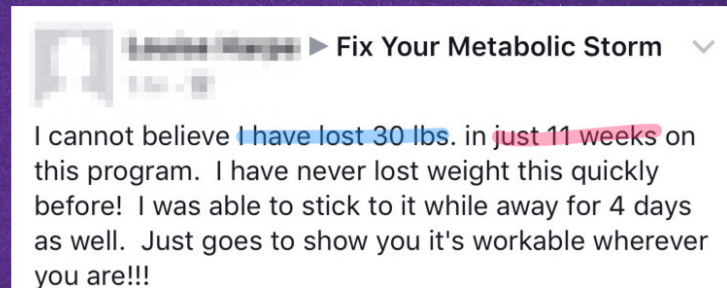

Here's another one.

She's just telling us how much this program's working for her.

She has more energy.

She's sleeping much better, and she's down 10 pounds.

This is another one...

This is one that just came up again recently, and we are so excited for this person. We've known this person since the start of the program.

In 11 weeks, this person's lost 30 pounds.

That's incredible. Again, could not lose weight for the life of her before because of the Metabolic Storm that was going on inside of her. The Fix Your Metabolic Storm program is the exact process that we use in our clinic.

- ▶ The “FIX YOUR METABOLIC STORM” program is the exact process that we use in our clinic.
- ▶ We put the program together for women who couldn’t visit our clinic.

It's important to understand that, because one of the issues that we had, we got phone calls and emails from so many women that wanted to come to our clinic...

They had friends or family or acquaintances, or they heard of the results that women were getting, but they just could not make it up to our clinic, because we're up in Northern Ontario.

It wasn't feasible for them to come up. We sat there, and we tried to figure out the best way to get the information they need to get better.

That's what we did in this program that we developed called Fix Your Metabolic Storm.

We put together a program for women who just simply could not visit our clinic.

*Can you remember what your life was like before
your hormones gave you problems?*

THE MARTIN CLINIC

We like to ask this question here:

Can you remember what your life was like before your hormones gave you problems?

For a lot of women, it's a long time.

It's been going on for a long time.

So can you remember what your life was like before you hormones gave you problems?

Also, what would your life be like if you had good energy, you were able to lose, weight, you slept better, and felt sharp? Now, doesn't that sound good?

- ▶ To Fix Your Metabolic Storm....
- ▶ You first have to FIX the main underlying problem. It is the main CAUSE.
- ▶ Know Your MetaStorm Type.

Now, to fix your Metabolic Storm, you first have to fix the main underlying problem. You have to fix the main cause. And then you also have to know, we call it your MetaStorm Type, which we're going to talk about in a few minutes.

We're going to go through, first of all, to help you learn how to fix the main problem, and then also how to know your MetaStorm type.

That's how you fix the Metabolic Storm.

First, you have to fix insulin. Now, people are always surprised when we say this. You have to be able to fix insulin. Now, why insulin? Now, why is insulin at the root of the issue that's going on with women in the Metabolic Storm?

Why is insulin that problem?

- ▶ Blood sugar is tightly regulated.
- ▶ When you eat, the food is broken down into glucose. This causes a rise in your blood sugar levels.
- ▶ Since blood sugar levels are tightly regulated, your body must do something to lower it.

The first thing you have to understand is that sugar is extremely toxic, so much so that your blood tightly regulates, your blood glucose levels. Your blood sugar levels are tightly regulated.

If they climb too high, you secrete insulin. If they climb too low, your body is desperately trying to bring your blood sugar back up. Too low of blood sugar is dangerous. Too high of blood sugar is dangerous. Glucose is very toxic. You don't need a lot of it in your body.

You don't need a lot of it in your blood, right? I think if you emptied out your four to five liters of blood, you'd see, what, less than a teaspoon there of sugar?

Anywhere between half a teaspoon to a teaspoon of sugar.

That's it.

- ▶ Insulin is secreted by your pancreas to help lower blood glucose levels.
- ▶ Insulin lowers blood glucose by “sweeping” it out of your blood.
- ▶ Insulin takes glucose out of your blood and stores it in one of three places...

Your body views sugar as toxic. Because it is so tightly regulated, that when you eat, food is broken down into glucose, right?

Everything is broken down into glucose, and this causes a rise in your blood sugar levels. Now, since blood glucose are so tightly regulated, your body must do something to lower it. This is where insulin steps in.

Insulin is a tremendous hormone that your pancreas secretes to help lower your blood glucose levels. Secondly, insulin lowers blood glucose by sweeping it out of your blood. I always tell people, "Look, insulin is important. You need it. Because without insulin, you'll never get that sugar, that blood glucose, out of your bloodstream. It needs to come out of there."

Sugar doesn't belong in blood, and so insulin takes the glucose out of your blood and stores it in one of three places.

MUSCLE (500GRAMS)

... I apologize for putting a picture of my biceps on the screen.

What happens, as we mentioned, is that because sugar is toxic, insulin has to take it and put it somewhere. It's the storage hormone.

One of the places it puts it is in your muscles, but you can only store about 500 grams of glycogen. Insulin takes glucose, glucose is converted into glycogen, and then glycogen is stored in your muscles.

You have a very limited supply of storage in your muscles, so you can only put so much in there.

Our muscles only really get depleted when we're exercising and stuff like that.

There's not a lot of room for muscle storage.

LIVER (100 GRAMS)

The second place that insulin will tell our body to store glucose is in the form of glycogen in the liver.

When the muscles are full, it'll store it in the liver, but the liver even has less space available.

Your liver's like a suitcase. It can only put so much in there

You can pack about a hundred grams of glycogen in there. That's not a lot when you think of it

... 100 grams isn't a lot.

The liver can only take so much, and the muscles. What do you do with all that extra glycogen or glucose that you have to store?

FAT CELLS (UNLIMITED)

Well, this is where fat cells come from, right?

You have an unlimited amount of fat cells that your body can make. When the muscles are full, and when the glycogen are full, and you're not using it for energy, your body says,

"Well, we got to put it somewhere." It takes it and it stores it in fat cells.

It will even make more fat cells.

You have an unlimited amount of fat cell storage.

But there's a problem with this as well ...

But there's a problem...

THE METABOLIC STORM

Even though you have an unlimited amount of storage, there's a problem with this.

Eventually, your cells stop listening to insulin.

If you have a chronic high levels of insulin for a long time, your cells just ... they stop listening to it. They get tired of listening to it.

As a result, your pancreas has to secrete more insulin in order to get the same job done. Right?

Think about this. You have to get rid of glucose. You're storing it in one of three places, mainly in your fat cells. Insulin is always circulating. It's always elevated. Your body says, "I'm done listening." So then your body has to make more of it just to get the same result done.

INSULIN RESISTANCE

This is what is called insulin resistance.

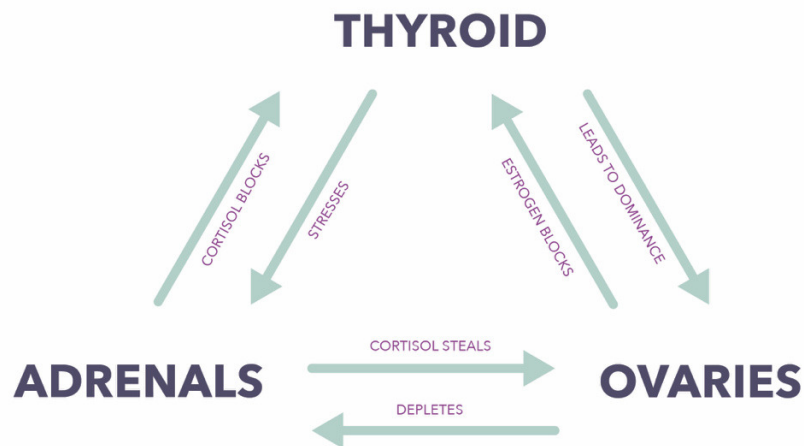

Insulin resistance is a major problem in the Metabolic Storm.

What happens in insulin resistance?

Well, your body overreacts to all carbs and sugars.

More fat ends up being stored, and more inflammation is being made.

This leads to more hormonal problems.

We showed you this picture here, right?

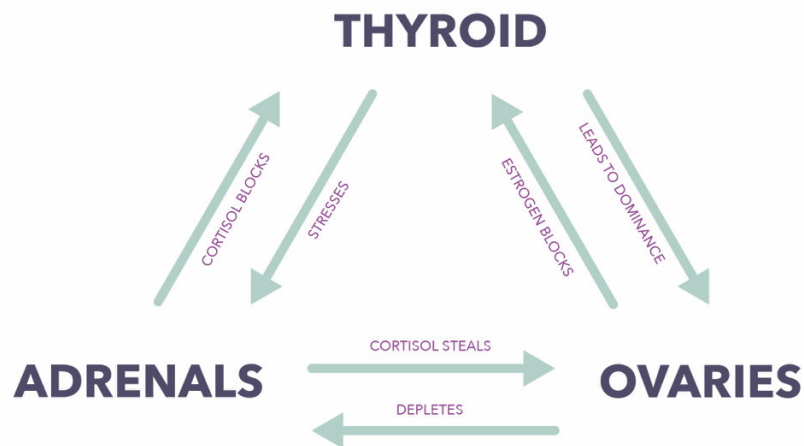

This is kind of the foundation, the underlying thing that's going on inside the Metabolic Storm.

You have a problem with your thyroid.

You have a problem with your adrenals.

You have a problem with your ovaries. But this is what's really going on behind the scenes even one layer deeper than that.

You have insulin that is controlling.

The insulin resistance and the insulin is affecting your thyroid.

It's affecting your adrenals.

And it's affecting your ovaries.

We call this the man behind the curtain, like in Wizard of Oz.

Insulin is the person behind the curtain controlling the situation.

Insulin is a big problem for women in the Metabolic Storm.

You have to FIX insulin in order to Fix The Metabolic Storm.

THE METABOLIC STORM

You have to fix insulin in order to fix your Metabolic Storm. We can't stress that enough. You have to fix insulin to fix your Metabolic Storm. This is, unfortunately, where it can difficult for people.

One of the reasons is is because insulin resistance becomes a driver of insulin. What do we mean by that? Well, you can have a couple of issues going on to become insulin resistant. You can have a constant stimulus of insulin. You can have foods that are high in insulin. Or you can have insulin pumping too long throughout the day.

There's a few different mechanisms for which insulin resistance becomes a problem. We have found this. We have found that there are three specific things that are stopping insulin from being normal. Again, we've done this by analyzing tens of thousands of patient visits.

*We have found that there are **THREE** specific things that are stopping insulin from being “normal”*

THE MARTIN CLINIC

We have found three specific things that are stopping your insulin from being normal. We call those three things the Three Insulin Roadblocks. Now, insulin roadblocks ... Basically, this is what we're saying. In order to fix insulin and fix your Metabolic Storm, you have to remove or fix these three insulin roadblocks, because they are stopping your insulin from getting back to normal.

There are three things that are stopping it. If you fix insulin ... by two things: by what you eat and when you eat.

What you eat and when you eat will help you fix insulin. In order to fix the Metabolic Storm, you first have to fix the main cause, or the main underlying problem, which we just talked about, is insulin. You also have to know what your MetaStorm type is. When you are in the Metabolic Storm, all three hormone-producing organs that we mentioned there ... the ovaries, the thyroid, and the adrenals ... they're all involved. No question.

INSULIN ROADBLOCKS

What we have found is that one of them is central. In that person, one of those ... Even though they're all involved, one of them is central. Some women in the Metabolic Storm have more thyroid involvement than ovaries or adrenals. It doesn't mean that they don't have ovary or adrenals issues. They absolutely do because they're in the Metabolic Storm. It just means that their thyroid is slightly more involved. Some women in the Metabolic Storm will have more adrenal involvement. And some women in the Metabolic Storm will have more ovary involvement. For example, we use terms like this: MetaStorm Type-A. When we say, "This woman is MetaStorm Type-A," we mean that this woman has more adrenal involvement. Again, it doesn't mean that her thyroid and her ovaries aren't involved. A MetaStorm Type-O has more ovary involvement. A MetaStorm Type-T has more thyroid involvement.

And then there's also something here that we find interesting. This is something that came up as well, and we call this a Category 5. This is somebody that just has them all equally bad.

Why it's important to know your MetaStorm Type?

THE METABOLIC STORM

Now, why is it important to know your MetaStorm Type? And people, you know, "Why is this important?" Why is this something that we use in our Fix Your Metabolic Storm program?

Well, we call it Rocket Fuel. The reason why we do this as well is, one of the questions that we get asked a lot has to do with supplements, nutrients. What should I be taking? Or, a lot of these women come in, and they got a list of five pages long of everything they're taking, because they got thyroid stuff. They got adrenal stuff. They got ovary stuff. I mean, they got a little bit of everything... cause they have every symptom, they just start taking everything. There's a lot of confusion with nutrients and supplements.

Because we are a functional health care and we use food and supplements, we wanted to be able to get women on the proper nutrients that they need, because there are many places you can start. We found this: it is much easier to figure out a person's MetaStorm Type, and then, from there, we can use the appropriate supplements.

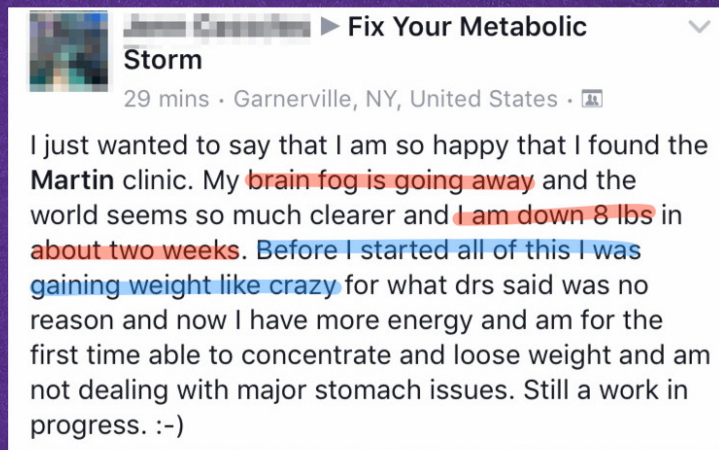

- ▶ Lots of confusion with supplements.
- ▶ Many places to start
- ▶ Easier to figure out your MetaStorm Type and then using appropriate supplements.

Our clinic's motto is: we don't guess, we test. We do biomarker testing. This is why we've been able to analyze over the years and show people a perfect protocol for your type. It's tremendous.

In the program, we help women identify what their MetaStorm Type is so that we can then start talking about specific nutrients that they need to start off in order to fix their Metabolic Storm.

Now, listen, we have very specific nutrient recommendations for women inside the Metabolic Storm. This is stuff we've been using at our clinic forever, stuff we've been recommending for a long time, because it works, because it gets results.

We have a very specific protocol that we use for women inside of the Fix Your Metabolic Storm. Yeah, that's right. We want them to start getting results faster.

Here's a lady that I know, and I'll just tell you a little about this specific ... how she came to us. Now, she's actually got a Black Belt in TaeKwonDo, extremely active, and for some reason gained 50 to 60 pounds over a period of a year and a bit. Didn't matter what she did. She couldn't get any answers from any doctors. Nothing. She was gaining weight. She was frustrated. She was active. Didn't feel good. Allergic to everything all of a sudden. On medication like crazy, and didn't feel well. Then she came upon our Metabolic Storm, you know, our program. This is what she says here, and this is after a short period of time. "I just wanted to say that I'm so happy that I found the Martin Clinic. My brain fog is going away," and this was a big issue with her," and the world seems so much clearer. I'm down eight pounds in about two weeks." Again, I can't stress this enough, this a woman who had gained about 50 to 60 pounds and couldn't lose weight no matter what she did. Already her weight was down eight pounds in about two weeks. Now, you don't think she was happy? "Now, before I started all this, I was gaining weight like crazy for what the doctor said was no reason."

- ▶ You joined us today for one of two reasons...
 - ▶ New Knowledge or new reality.
 - ▶ If you are here for new knowledge, this is a perfect time to log off this training. If you would like to change your reality, Like Jen and so many others have, let us show you. Are you interested?
-

If you're on this online training, generally ... We've been doing this for long enough. We know that there are basically two reasons why people join us on these trainings. Basically, it comes down to, they want new knowledge or they want a new reality.

At this point, we like to be straightforward with people and say, "Listen, if you are here for new knowledge, this is a perfect time to log off." You've gotten the knowledge that you need.

You understand that you have an insulin problem. And you understand that the problem is much deeper than you may realize, and there are three hormone-producing organs going on. If you are here for new knowledge, fantastic. Awesome. We hope that you got exactly what you came for, but this is a good time to log off. But if you would like to change your reality like Jen, like the case study I just read, and so many others have, then let us show you at this point. If you're interested, just type in yes, you're interested, and then we'll go on to what we're offering here.

- ▶ This is the exact process that we use in our clinic. The same process that has helped thousands of women with hormonal problems.
- ▶ The Fix Your Metabolic Storm program is an online video course/program that you can watch from your home (or anywhere)

As we mentioned, we developed a program called Fix Your Metabolic Storm. This program, as we mentioned, is the exact process that we use in our clinic. It's the same process that has helped thousands of women with hormonal problems. It's the same process that helped Jen and those testimonies that you read earlier.

There's a lot of information to share and teach. Because you always say, "The Latin word for doctor is teacher." We have to teach them about their health and what's going on. They have to understand the issue

. Because with knowledge, there is power when you know what's going on.

One of the biggest things that we hear in our private Facebook group all the time is they finally feel like they know what's going on....

FIX YOUR METABOLIC STORM

FIX YOUR METABOLIC STORM PROGRAM

This information gives people choices. You get a lot of information, but it's a video program.

You can watch that from anywhere, your home or anything. That's what we really want to do. We wanted to bring the Martin Clinic to you guys. That's why we developed the program.

Now, specifically, the Metabolic Storm program contains six modules. We want to say this, because one of the things we know is that a lot of women in the Metabolic Storm, their brain is just not working as sharp as it is.

You have lifetime access to this program, so you can take as much time as you need to go through the course. We want to say that right off the bat.

- ▶ 6 Module home video program/course
- ▶ Module 1 - Are you in the Storm?
- ▶ Module 2 - Insulin Harmony
- ▶ Module 3 - Remove The Insulin roadblocks
- ▶ Module 4 - What is your metastorm type?
- ▶ Module 5 - How to fix your metastorm type
- ▶ Module 6 - Resources

In our first module is, we talk about, are you in the storm? But we also talk about why you're in the storm, how you got there. Then we talk about insulin harmony. Now, remember, when you are in the Metabolic Storm, you are no longer in insulin harmony. Your insulin is out of whack. It's a problem. And then in Module 3, we teach you specifically how to remove the three insulin roadblocks that we have found that stop people from being able to fix their insulin. We have gathered this information over years and analyzing tens of thousands of patient visits. Then in Module 4, we teach you how to determine what your MetaStorm Type is. In Module 5, then we teach you how to fix your specific MetaStorm Type. We talk about nutrients specifically for your MetaStorm Type. And then Module 6 is, we got a lot of great resources in ... a lot of downloadable stuff, a lot of downloadable food stuff, videos on ...

- ▶ Most of these online programs, from people with much less experience, cost between \$997 and \$1997.
- ▶ The cost to hire us to teach this information is much more.
- ▶ We wanted to make this course very affordable to women.

We even have videos on what to look for in supplements, because we had a lot of questions on that. A lot of good information in there. That's the outline of the program.

Now, much of these online programs, and we've seen them from people with so much less experience, they cost anywhere between \$997 and \$1,997. If they fix their hormones, that's worth it. To completely change somebody's life, that's worth it. Also, the cost to hire us to teach this information is so much more than even that.

If we go and do a weekend seminar, the organizers ... It costs a lot more than that. But we wanted to make this course very affordable for women.

Our Fix Your Metabolic Storm program costs \$297.

- ▶ If you purchase the program within the next few days...
- ▶ You can get full access to the program for only **\$97**. We find that those who take action get the best results, so we want to reward action takers.

As we mentioned, as a bonus for watching this online training with us, if you purchase the program within the next few days, you will get full access to program for only \$97.

That's \$200 off the price.

Even as we said, at \$297 is already a tremendous value. If you purchase the course within the next few days, you will get full access to the program for only \$97.

The reason why we're doing this is very simple.

BONUS

- ▶ You also get access to the PRIVATE Facebook group.
 - ▶ Our staff of weight loss experts and health coaches monitor the group to answer all of your questions as you go through the program.
 - ▶ We also do a weekly Facebook Live Q&A
 - ▶ Private groups like this are normally \$97/month and you get Free access for a year. That's a \$1164 value.
-

We find that those who take action get the best results. We wanted to reward those who are action takers. If you buy within the next few days, you also get access to our private Facebook group. Now, we cannot say enough about this group. First of all, we have staff that ... We have weight loss experts and we have health coaches that monitor this group. They're there to answer your questions as you go through the program. I mean, that is so valuable to have experts at your fingertips ...normally, these kind of private groups, we run for about \$97 a month because of the access that they get to trained professionals.

- ▶ You also get Lifetime access to the course.
- ▶ A 30 day money back guarantee

You also do, and I also do, a weekly live Question/Answers right in there. You go live on video. People ask you their questions. Now, normally, these kind of private groups, we run for about \$97 a month because of the access that they get to trained professionals. But we're going to give you free access for a year in this group, which is, alone, which is over \$1,100 value, just for buying within the next couple of days. As we mentioned, you also get lifetime access to the program, and, to make it a no-brainer, we offer a 30-day complete money back guarantee.

- ▶ Full Access to the FIX YOUR METABOLIC STORM program for 97
- ▶ One year access to our Private Facebook Group...valued at \$1164
- ▶ Lifetime access to the program
- ▶ 30 day money back guarantee

You gain full access to the Fix Your Metabolic Storm program for only \$97.

You get one-year access to our private Facebook group, which is valued at over \$1,164.

You get lifetime access to the program.

And you get a 30-day money back guarantee, all if you purchase within the next five days. After the five days are up, you can still get the course.

- ▶ The offer expires in 5 days.
- ▶ After the 5 days, you can still get the course. Even at \$297 it is a tremendous value.

Even at \$297, it's a tremendous value.

If you look at these women, the results their getting, they would pay a lot more for those results.

They would happily pay it.

Even at full value of \$297, you're getting tremendous value. If you take advantage of this offer for the next five days, you'll get a hundred dollars off that, plus access to our free Facebook group.

- Are you ready to fix your hormones?

The question we want to leave you with is: are you finally ready to fix your hormones?

THANKS FOR WATCHING.

We want to thank you for watching this online training. At this point here, if you have any questions, email us at info@martinclinic.com. That's a great way to get a hold of us.

Also, you'll see below that there's a link that will take you to buy the program if you want to buy it right now.

Again, we really want to thank you for taking the time to join us on this online training. We're truly humbled by the fact that you set aside time to join us on this. Thank you very much for watching.

BUY NOW
