THE MARTIN CLINIC RESET

THE DIET YOUR DOCTOR WONT SHARE WITH YOU

INTRODUCTION

Clear and Present Danger

I am writing this book in the midst of COVID-19 an unprecedented time to be sure. A little virus, one that can barely be seen with a microscope has brought the whole world to its knees.

THE ELEPHANT IN THE ROOM

During Covid people were scared skinny over this virus. They were forced to close their business, self isolate and squeal on neighbours and friends who weren't complying. Wearing a face mask was the "new normal." Loved ones were dying in the hospitals or in senior homes all alone with no visitors very sad indeed!!!

But... what very few were talking about is pre-existing conditions- really the only people who are getting sick or dying from this pathogen.

This book is about the pre-existing conditions. The clear and present danger is not Covid, it's not the environment, it's not the climate it's our total collapsing deathcare system.

Covid has or should have taught us a very important lesson. We got exposed!! North Americans are very unhealthy -as a matter of fact 88% of the population has metabolic syndrome- **The Elephant in the Room.**

WHAT IS METABOLIC SYNDROME?

Metabolic Syndrome has many different possible signs such as:

- 1) elevated blood pressure
- 2) elevated uric acid
- 3) belly fat/obesity
- 4) fatty liver
- 5) increased blood sugar
- 6) elevated triglycerides
- 7) low HDL (good cholesterol)

Metabolic Syndrome has one underlying cause - **high circulating insulin or insulin resistance.**

IMAGINE!! 88% of the population according to the CDC has metabolic syndrome... that means only 12% of the folks in North America are metabolically healthy-incredible.

And... if you have metabolic syndrome your risk goes through the roof for:

Heart Disease or stroke
Cancer
Alzheimer's and dementia
Diabetes
Auto immune
COVID

So this book is about metabolic syndrome - How we got there and - more importantly what to do to fix it.

USA STATS AS OF 2018

- 12% metabolically healthy
- 50% have high blood pressure
- 88% metabolically unhealthy
- 50% of the population is obese
- 50% are diabetic or pre-diabetic

90% of the population is on the road to diabetes

P.D. Mangan

Microbiologist

The annual costs in the USA alone for:

- 1) Diabetes is a \$100 billion
- 2) Heart disease, \$88 billion
- 3) Cancer, each new diagnosed patient costs \$100,000 to the medical system.

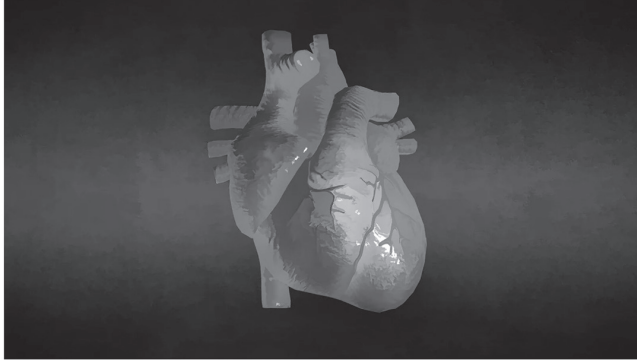

In 1970 when I was in school, one of the 20 women developed breast cancer.

Today it is one out of six. What happened to the war on cancer that president Nixon declared in the 1970s?

In 1970, one out of 20 men after the age of 50 got prostate cancer. Today, it is one out of four. In 1990, one out of 30 people in North America had a risk of developing any type of cancer. Today, it's one out of three in North America will develop cancer in their lifetime.

AHA reports almost half of American adults have heart disease

February 8 by Frida Hofmann Kruse  , medical review by Dr. Bret Scher, MD  in Heart disease, New study

Nearly half of US adults have some kind of heart disease according to a new report from the American Heart Association (AHA). In addition, deaths from heart disease continue to inch up, as they have since about 2010, after a steeper decline for several decades.

CNN: **Nearly half of US adults have cardiovascular disease, study says**

CHAPTER ONE

METABOLIC SYNDROME WILL KILL YOU ONE WAY OR ANOTHER

Previously we talked about metabolic syndrome. Now metabolic syndrome has one cause - **FOOD!**

It's food that causes metabolic syndrome. It's as simple as that. Now if you are part of the 88% of the population that has metabolic syndrome! You know what the cause is!! **It's food!!** Yup - its food that elevates your insulin.

OK got that? Now let's get more specific - what food?

It's carbs and especially sugar

Wow now stay with me here - 88% of the population has metabolic syndrome and if you have metabolic syndrome you are on the **Titanic!!!**

Because if you have metabolic syndrome and you don't fix it you are headed for disaster!

I love the story of the Titanic. Did you know that the SS Californian was sailing in the same waters as the Titanic on April 15th, 1912? All day they were trying to get the Titanic to change course. Apparently, the Titanic sailor who was getting those Morse codes got so tired of the warning from the Californian that his last message back to them was -Shut up I am tired!!

WARNING!! WARNING!! WARNING!!

I hate to be morbid but if you don't change course and you have metabolic syndrome you are on the Titanic and you are going to soon hit the iceberg of:

- 1) heart disease and stroke
- 2) cancer
- 3) Alzheimer's and dementia
- 4) diabetes

These four conditions are the leading cause of death in North America

Every day heart disease and stroke kill 2100 people

Every day cancer kills 1600 people

Every day Alzheimer's kills 322 people

Every day diabetes kills 228 people

These are some things can't be controlled in life but....

metabolic syndrome is 100% controllable

INSULIN THE DEATH HORMONE

Let's talk about a hormone that is called insulin. I often tell my grandchildren that grandpa had ice cream and cookies too, you know. But in the 1950s North Americans consumed about 25 pounds of sugar a year.

My four children were born in the 1970s including my son, Dr. Anthony Martin Jr. North Americans were then consuming 50 pounds of sugar a year. In the year 2020, North Americans on average are consuming near 200 pounds

of sugar a year. What does sugar have to do with heart disease, cancer, Alzheimer's, and diabetes?

HEART DISEASE - THE LEADING CAUSE OF DEATH

I will get into this in more detail later, but heart disease is not caused by cholesterol and eating saturated fat, heart disease and stroke is caused by elevated triglycerides, TG, three balls of fat from sugar. Big pharma loves to dupe people into believing the cholesterol myth, because cholesterol lowering medication, specifically Lipitor, is the number one selling drug of all time. You want to lower your risk of heart disease, cut sugar from your diet.

Sugar is the new smoking!!!

CANCER

You know what a PET scan is? It's not for your pets! It's an MRI on steroids and is specifically diagnostic for cancer. Do you know how a PET scan works? They give you a cup of radioactive sugar, then put you in a machine and if you have cancer, you light up like a Christmas tree!!! So if you have cancer or you know anyone who has cancer, stop the sugar, all sugar, because cancer needs sugar to survive and thrive. By the way, a new study out showed that a high sugar diet increases colorectal cancer by 600%.

A CT scan gives an exquisite picture of anatomy but if it sees a mass, it has almost no ability to determine if that mass is a scar tissue or cancer or something else.

In the case of a PET scan- the cornerstone of imaging management for more than a decade we use radioactive glucose and cancer tends to stand out because cancer cells need a lot of glucose to work.

Dr Webster

Nuclear Medicine Specialist

ALZHEIMER'S

Imagine the dreaded disease has crept up to number three on the hit parade on how we are going to die. In the United Kingdom, it is the number one reason that people die across the pond, can you believe it? If you looked at my medical books in the 1970s, look under A and you won't find Alzheimer's. This is a modern day scourge.

Now, what is the alternative name given to Alzheimer's? Type 3 diabetes. Once again, the link to sugar. Sugar is very destructive to the HIPPOCAMPUS. Remember, campus, school, memory. That's the part in your brain that contains the memory center. Again, I will go into more detail on how sugar destroys the brain later.

DIABETES

Number four on the death parade is diabetes. Fifty percent of people in North America is either diabetic or pre-diabetic

like Dr. Kraft (not Kraft dinner), the number one expert on diabetes used to say, “There is no such thing as a pre-diabetic. If you are a pre-diabetic, you’re already diabetic.” Now, this is the easy one. How do you become a diabetic? You are a carbolic and you eat and drink too much sugar. The average American consumes 50 GALLONS of soda a year. The number one selling fruit in North America is ORANGE JUICE FOR HEAVEN SAKES!! Start your day with orange juice you might as well have 2 chocolate bars and a soda. CRAZY ISN’T IT???

So there you have it. The four leading causes of disease have a common denominator. It’s called sugar.

Too much sugar, = heart disease and stroke.

Too much sugar = cancer.

Too much sugar = Alzheimer’s and dementia.

Too much sugar = diabetes.

You can’t out exercise a bad diet!!

You can’t absorb vitamin D on a bad diet!!

You can’t out supplement a bad diet!!

You can’t fight cancer on a bad diet!!

You can’t beat heart disease on a bad diet!!

You can’t beat Alzheimer’s on a bad diet!!

You can’t beat auto immune disease on a bad diet!!

You can’t have a healthy immune system to fight Covid and other viruses on a bad diet!!

COVID 19 AND METABOLIC SYNDROME

A news story out of the United Kingdom which most of the media ignored during Covid 19 tells you all you need to know about how the immune system is connected to metabolic syndrome.

- if you are overweight at all you are 3x more likely to die of Covid.

- in 2017 in Britain they found out that the flu shot didn't work for people who are obese - obesity = no antibodies to fight the flu or Covid!! (Is this why the flu shot only works 30 to 40% of the time every year)?

When this is over we need a public health drive to make people aware that obesity is very dangerous.

Dr David Hasslom
Chairman National Obesity
Forum U.K.

Metabolic Syndrome ➤ obesity ➤ creates inflammation

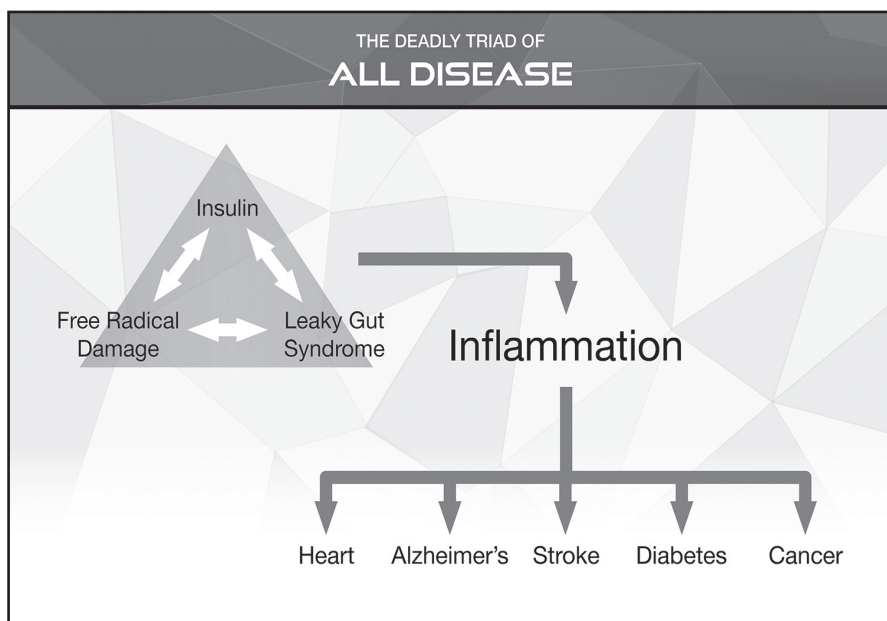

COVID VIRUS = Major inflammatory storm which usually settles in the lungs leading to a major complication in COVID-19!

CHAPTER TWO

THE UNHOLY TRINITY

We at the Martin Clinic are big time into reverse engineering, meaning if you have a condition like heart disease, cancer, Alzheimer's, diabetes, we like to work backwards to find out the cause. For example, modern day medicine recognizes that inflammation is at the root of over 60 diseases, including the big killers of heart disease, cancer, Alzheimer's, and diabetes.

Yes, we at the Martin Clinic agree that inflammation is always present in these disorders, but inflammation is not **HOUDINI!** It just not does not show up without a reason.

THE UNHOLY TRINITY

If you have to go back one more step to find out the root cause of all disease, we call it the unholy trinity. The root cause of all disease is found in one of these three things:

#1 HCl, high circulating insulin.

#2 Leaky gut.

#3 Free radical or oxidative damage.

The reason we have been so successful at the Martin Clinic in treating all these disorders is because our protocols are set up based on these metabolic changes in the body that are caused by one of these three things, or two of these three things, or all three of them. When you know what the cause is, you can actually start to fix the problem.

Friend, if you have cardio problems, cancer, Alzheimer's, diabetes or auto immune disease, the cause is in the unholy trinity. We just don't get these disorders overnight. You don't wake up one morning with cancer. "Well, last week I didn't have cancer and now my doctor says I have cancer."

BREAST CANCER - LADIES LIVES MATTER

I use an example of breast cancer. Ladies, never a bad idea to do a self-examination, you're in the shower to just check if you feel a little lump. And let's say you go to your family doctor, and the family doctor sends you for a mammogram and then the mammograms shows maybe a little spot or whatever and they call you and they say, "We'd like to do a biopsy." After the biopsy, if the doctor calls you, you know it's always bad news if the doctor says, I want to see you

in my office. But if the doctor calls you into the office and says, “You know what, you have cancer.” Just understand that cancer has been there for at least five to 10 years, way before you could ever feel it as a lump.

BALLPOINT PEN

I always like to use the illustration of a ballpoint pen. For cancer to grow to the size of the tip of a pen takes five years at least!!! Now think about that ladies, how would you ever feel something that small in breast tissue?

Modern medicine is not into prevention but detection. Prevention of disease is the key to this book. Don't wait for cancer or heart disease or any other killer to get to you. Start with prevention.

PREVENTION STARTS WITH YOUR DIET and understanding the underlying causes of disease.

CHAPTER THREE

HIGH CIRCULATING INSULIN

We wrote a book several years ago called **Serial Killers: Two Hormones That Want You Dead**. One of those hormones was insulin and the other was cortisol, a stress hormone.

INSULIN-WHAT IS IT?

- #1 Insulin is a hormone that you secrete only when you eat.
- #2 Insulin is the master storage hormone.
- #3 Insulin is needed big time when you eat carbs and sugar.
- #4 When insulin is present in your bloodstream, it is impossible to burn fat.
- #5 Insulin's primary job is to take sugar out of your bloodstream and store it in cells.

SUGAR IS HIGHLY TOXIC If you don't think sugar is toxic - empty your five liters of blood in your body, you'll be left with less than one half of a teaspoon of sugar. **WHY?** Sugar destroys your blood vessels. It is poison for the blood vessels, especially the little guys called capillaries. Capillaries are so tiny that red blood cells have to line up single file in order to go through them. Capillaries are known as micro-circulation which affects your eyes, brain, kidneys, legs - damaged capillaries are why diabetics have trouble with all of the above.

If you are a carboholic, (put your hand up and repeat after me - My name is and I'm a carbolic). Your cells will eventually resist insulin. **Let's follow a piece of bread.** Have a slice of bread and it will be sugar in five seconds. Remember, sugar cannot remain in your bloodstream because it is highly toxic, so your body, which is wonderfully made, tells the pancreas to secrete insulin to get sugar out of the bloodstream.

INSULIN IS A TRAFFIC COP

In our hometown, the week before Christmas, there is a traffic cop at our local Costco. Their job is to move traffic and park cars. Insulin is a traffic cop that absolutely must take sugar out of the bloodstream. So insulin directs the sugar made from bread to park it into,

- #1 The liver
- #2 The muscles,
- #3 Fat cells.

LIVER

The primary parking spot for sugar is the liver. So think of your liver as the Costco parking lot or a suitcase. Now, stored sugar in the liver is stored as what? Fat. Fat don't make you fat, sugar makes you fat.

MUSCLES

The bigger your muscles, (that is why we love weightlifting), the more storage room there is for sugar. That is why weight lifters can eat more carbs than most people because they have big storage bins.

FAT CELLS

When the liver,(the suitcase or the parking lot is full), insulin has an unlimited ability to make fat cells. This is how people get fatty liver. Another modern day scourge in our society is NAFL, nonalcoholic fatty liver. It is estimated that now over

50% of the population have fatty liver, and most people don't even know it.

OBESITY

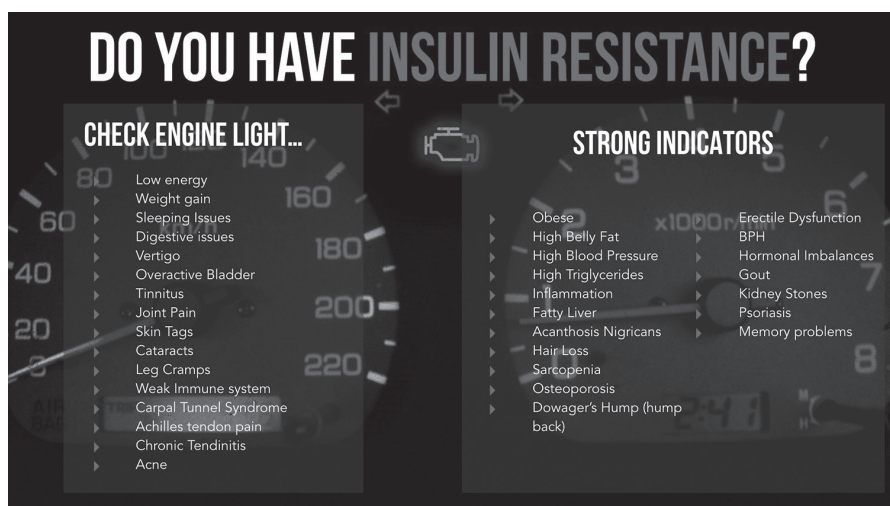

If you left the planet 50 years ago and went to live on Mars, and you came back today, you would get the shock of your lifetime, wouldn't you? You would say what the H double hockey stick as happened to the Earth's population? Everyone or most everyone is so big. They're so fat. Watch an old movie from the 1950s or the 60s and everyone was skinny. Obesity is not the cause of disease, but rather a symptom of what is called metabolic syndrome caused by high circulating insulin.

Skinny people are not healthy either. You can be skinny as a rake and yet be very unwell. That is because if you're a bad eater and you're skinny, you can't see the fat damage to your liver, kidneys and heart. It's invisible, visceral fat, but fat around your organs is more deadly than any other fat.

Again, high circulating insulin turns the body into a constant storage mode. When insulin is present, it is the jail guard that won't let fat escape. When you are insulin sensitive, meaning your body does not need to secrete high amounts of insulin, your body secretes leptin, a hormone that says, "Hey, stop eating. I'm full." When you lower your secretion of insulin, your body also secretes glucagon, (gone). This is a fat burning hormone, but you need to have your insulin to be in a good shape. If you have insulin or high circulating resistance to insulin, you are going to be metabolically in trouble.

CHAPTER FOUR

CHECK ENGINE LIGHT

Cars and trucks today are really just computers with a combustible engine. When the check the engine light comes on, it can be a simple thing as I forgot to tighten the gas cap or a major transmission problem. You head to the mechanic who uses a computer to find out what is wrong with the car. Your body is much like the modern day car. Your body will give signals like check the engine light that something is wrong. For example, here are some of the check the engine lights, pain, swelling, edema, fever, fatigue. These are all check engine lights for your body.

In this chart above your body is giving you clues that all is not well with your insulin. Some of these symptoms are very

remarkable. Most of my patients are shocked when they see this chart “Do You Have Insulin Resistance?” Look at the surprising symptoms of high circulating insulin such as:

Vertigo and Tinnitus

Joint Pain

Skin tags

Carpel Tunnel Syndrome

Chronic Tendonitis

Gout

Kidney Stones

Psoriasis

Digestive Issues - the most common is acid reflux. Yes acid reflux is your body screaming at you- HELLO! You there stop eating sugar and crappy carbs. It’s amazing when I tell patients that acid reflux is a symptom of elevated insulin.

Sleeping Issues - Sleep apnea is again like an epidemic today. If you invested in the stock market for companies that made the sleep apnea machines 20 years ago you would be a multimillionaire today. Sleep apnea is not caused by a lack of oxygen to the brain- that is a symptom. The cause is insulin resistance and metabolic syndrome from eating crappy carbs.

Insulin Resistance		Inflammation, Fatty Tongue,
or	=	Sleep Apnea,
High Circulating		decrease oxygen to the brain
Insulin		

Yup- if you have sleep apnea you’ve got a fat tongue. If you snore you got a fat tongue. When your tongue becomes obese it blocks oxygen from getting to the brain. Amazing

after doing the Reset Diet most patients with sleep apnea are drastically improved!

High Blood Pressure - 90% of people with high blood pressure have high circulating insulin as the cause. Amazing what happens when you get to the root problem.

E.D.- Erectile Dysfunction - men the answer is not the little blue pill. The problem is insulin resistance or high circulating insulin. Men change your diet for a great sex life!!

Hormonal Issues - ladies I know you often suffer what we call HORROR-MONES at the Martin clinic. Benefits of the Reset diet include not only lowering your insulin but also balancing hormones and restore normal thyroid function.

CHAPTER FIVE

HIGH FRUCTOSE CORN SYRUP THE ANTICHRIST OF SUGARS

The Bible speaks of Satan as a deceiver. It says that Satan masquerades as an angel of light. High fructose corn syrup, which is found in almost every food you could think of, is exactly that, a deceiver. *First of all, this sweetener is highly industrialized and is metabolized differently than ordinary cane sugar. As we have already established that sugar is highly toxic, but high fructose corn syrup is poison on steroids.*

The food industry started manufacturing this sugar. It sounds healthy, doesn't it? High fructose from fruit, corn. Corn's good for you, isn't it? Folks, you could just about run your car on this stuff. It's sugar made in a lab. Here is why it is so dangerous:

#1 It is highly addictive Remember, the tobacco folks who were best at making addicts out of people were hired by the food industry to continue their trade.

#2 Like Monopoly, high fructose corn syrup does not pass go, (your gut), and gets metabolized directly in your liver. It causes lipogenesis like no other sugar because *the liver turns it into dangerous triglycerides very rapidly. It is estimated that 70% of North Americans have some form of fatty liver, and high fructose corn syrup is a major culprit in this disorder.*

92 NAMES FOR SUGAR

Agave	Crystalline fructose	Glucose	Nectar
Agave nector	Date sugar	Glucose solids	Palm sugar
Barbados sugar	dehydrated cane juice	Glucose syrup	Pancake syrup
Barley malt	Dextran	Golden sugar	Panocha
Beet sugar	Dextrose	Granulated sugar	Raw sugar
Blackstrap molasses	Diastatic malt	Grape sugar	Refiner's sugar
Brown sugar	Diastase	Gum syrup	Rice syrup
Buttered syrup	Dried oat syrup	High fructose corn syrup	Saccharose
Cane juice	Ethyl maitol	Honey	Sorbitol
Can juice crystals	Evaporated cane juice crystals	Icing sugar	Sorghum
Cane juice solids	Evaporated cane juice	Invert sugar	Sorghum syrup
Cane sugar	Evaporated cane syrup	Invert syrup	Sucanat
Cane syrup	Evaporated sugar cane	King's syrup	Sucrose
Caramel	Florida crystals	Lactose	Sugar
Carob syrup	Free-flowing brown sugars	Malt sugar	Sugar granulated
Castor syrup	Fructose	Malt syrup	Superfine sugar
Coconut palm sugar	Fructose crystals	Maltodextrin	Sweet sorghum
Coconut sugar	Fruit juice	Maltol	Syrup
Confectioner's sugar	Fruit juice concentrate	Maltose	Tubinado sugar
Corn sweetener	Fruit juice crystals	Mannose	White sugar
Corn syrup	Galactose	Maple sugar	Xylose
Corn syrup solids	Glazing sugar	Maple syrup	Yellow sugar

#3 High fructose corn syrup spikes insulin big time and it changes the body metabolically. High insulin = inflammation. High insulin = stored fat.

#4 It elevates your uric acid levels. Uric acid is a direct byproduct of fructose. Again, high fructose corn syrup is directly responsible for a modern day epidemic of gout - no its not purines - it's fructose.

High levels of uric acid = high blood pressure.

High levels of uric acid = kidney stones and kidney stress.

High uric acid increases inflammation.

#5 It affects the gut lining.

High fructose corn syrup changes the microbiome. It causes an overgrowth of candida, creating what medicine calls dysbiosis. I tell my patients all the time, *“Don't feed the bears.”* In Northern Ontario, we have a lot of bears and we are constantly being told to put away our garbage because it's going to attract the bears. Yeast in our gut loves sugar, especially high fructose corn syrup, so don't feed the bears.

#6 High fructose corn syrup contains mercury.

Yes, this poisonous sugar made in an industrialized vat contains mercury. People today are aware of mercury in fish. I tell them, “Don't be worried too much about fish. Worry about every item in the middle aisle of your grocery stores because any sugar added comes from high fructose corn syrup.”

#7 High fructose corn syrup makes kidneys secrete magnesium.

This is one of the reasons the population generally are low

in magnesium. This important mineral is involved in over 300 functions in your body. High fructose corn syrup makes you deficient in magnesium. This is one of the reasons why I test patients with depression and high anxiety and they are often deficient in magnesium. Sad to say that most consume way too much high fructose corn syrup.

#8 High Fructose Corn Syrup decreases Vitamin D.

Your body cannot thrive without Vitamin D, and high fructose corn syrup depletes your Vitamin D levels in your cells. Low levels of Vitamin D really hampers your immune system.

#9 High Fructose Corn Syrup decreases chromium.

Chromium is an important mineral that helps to stabilize your blood sugar. Guess what? High fructose corn syrup depletes your levels of this important mineral. Too much high fructose corn syrup = low chromium = accelerated diabetes.

#10 High fructose corn syrup decreases your dopamine and your serotonin.

I don't have to remind you that depression and high anxiety have taken a huge toll on our society today. 25 million Americans are on anti-depressants, a 60% increase since 2010. There is a 60% increase in depression since the advent of high fructose corn syrup. Dr. Abram Hoffer, founder of the Orthomolecular Institute, did studies years ago that showed high fructose corn syrup was as addictive as cocaine.

Ask any parent and they will give you first-hand testimony of what sugar and especially high fructose corn syrup does to children. Better yet, ask teachers. You can go to PubMed

and find countless studies on the *improvement in children's behavior when you eliminate or drastically reduce high fructose corn syrup from their diet.*

CHILDHOOD FRUCTOHOOLISM

There has been an increase of fructose consumption by 300% in last 20 years. Nobody has paid a bigger price than our children and our grandchildren. Imagine that children today are the guinea pigs of the food industry. Kids today suffer from obesity, fatty liver, Attention Deficit Disorder, learning disabilities and pre diabetes. Our poor younger generation live on pizza, Krappy dinner, noodles, juice boxes full of hidden sugars to get them addicted very sad indeed.

CHAPTER SIX

INSULIN AND THE BRAIN - Don't outlive your brain!!!

Your brain is headquarters. It literally loves and needs fuel to run the whole body. So when you eat a lot of carbs, sugar rushes to your brain. However, insulin - the traffic cop says "hey sugar-get out of the brain I need to park you somewhere else"

Big Problem

You have something called the blood brain barrier that literally protects the brain from toxins/bacteria/viruses/yeast/heavy metals.

The blood brain barrier is an invisible shield. The human body-wow-what a God that created this!!

Insulin Resistance/High Circulating Insulin

Now if you have been a carboholic your resistance to insulin is elevated causing changes to the blood brain barrier. This barrier won't allow insulin to come into the brain and take the sugar out. *So what happens?* Sugar stays in the brain and saturates the hippocampus-(the memory centre of the brain). This eventually destroys memory cells.

See how important it is to protect your brain from sugar!!

THE STARTLING LINK BETWEEN ALZHEIMER'S AND INSULIN

- #1 The higher the blood sugar the faster the cognitive decline
- #2 Diabetics are twice as likely to get Alzheimer's or dementia
- #3 Remember over 50% of the population are diabetic or pre-diabetic
- #4 Most pre-diabetics are really diabetic but they just don't know it yet

Alzheimer's is like a slow burning fire-you don't see it when it starts. But... by the time you find it, it's too late!

SCARRRRRRRY!!

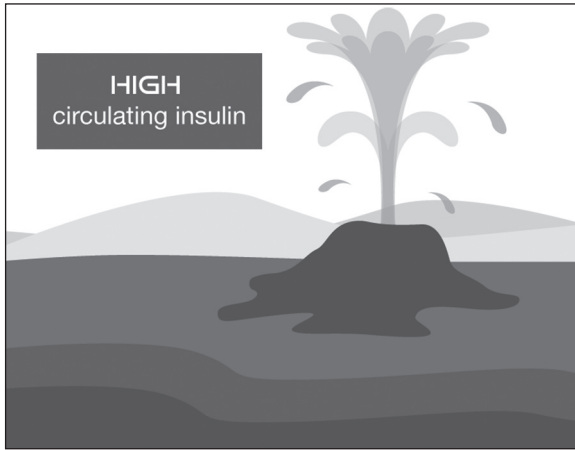

Sugar alters brain chemistry in just 12 days!

Sugar acts just like cocaine. It is highly addictive and your brain will call for it day and night!

There have been experiments showing the similarity between sugar and cocaine. They both take the same path to the feel good centre of the brain. Once you carve out that path in the brain you're hooked!!

CHAPTER SEVEN

REVIEW OF HIGH CIRCULATING INSULIN

High circulating insulin is dangerous
High circulating insulin > Increase in heart disease
High circulating insulin > Alzheimer's
High circulating insulin > Dementia
High circulating insulin > Cancer
High circulating insulin > Diabetes
High circulating insulin > Covid 19

Simply put, high circulating insulin is the major cause of all the top killers. Why? Because high circulating insulin causes significant inflammation.

I remember a study done as far back as 2000 that looked at the role of the CRP, C-reactive protein, in insulin resistance. Now, CRP is a known marker of inflammation. So in infection, CRP goes up. You get injured, CRP goes up. You ingest toxins, CRP goes up. In auto immune disorders like rheumatoid arthritis and Chron's CRP goes up. Chronically elevated CRP can reveal a state of systemic inflammation, which means your entire body is in an irritated state. Chronic inflammation can result in heart attacks and strokes, because inflammation damages the teflon like lining of the blood vessels. This can lead to atherosclerosis and hardening of the arteries.

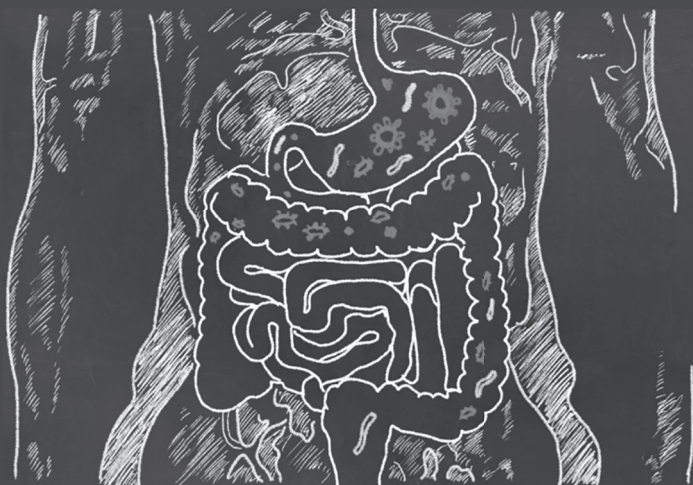

A person with high circulating insulin can be loaded up with inflammation and *have no real symptoms*, which is why inflammation can be such a silent killer. *It's why most people that drop dead from a heart attack have normal cholesterol levels, and very few Doctors even look for high levels of CRP (inflammation).*

PART 2

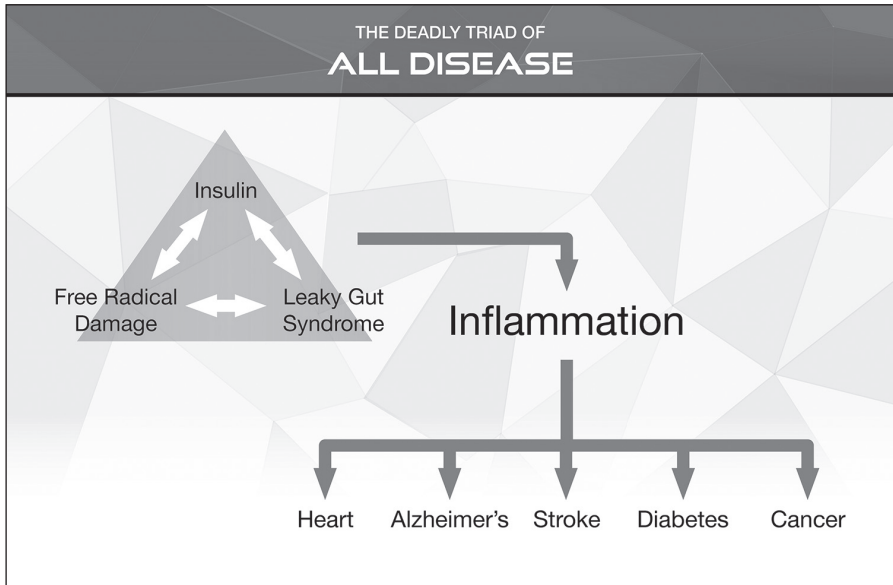

UNHOLY TRINITY OF DISEASE

LEAKY GUT

The Hidden Gut Disorder Causing Fatigue, Pain, Autoimmune Disease, Dementia, Alzheimer's, Skin Conditions, and Hormonal Problems

MARTIN  CLINIC

Hippocrates, the father of medicine, 2000 years ago said, “All diseases start in the gut.” Wow, what insight. Now, finally, medicine is starting to realize that this dude was right.

THE INVISIBLE WAR

The human body is involved in a battle every day between good and bad bacteria. I tell my patients every time they step on a scale, take three pounds off your weight because we have three pounds of bacteria, over a hundred trillion bacteria. People think of bacteria as germs that are not good for you, but our bodies can't live without bacteria. As a matter of fact, we have more bacteria in our body than we have cells. We know so much more about the invisible battle today that goes on throughout our bodies, but mainly in our gut.

WHAT IS LEAKY GUT?

Our gut-blood barrier is a fine single lining of endothelium that is meant to keep bad bacteria, viruses, undigested foods, toxins, out of the bloodstream. Your friendly bacteria help to prevent leaky gut by keeping bad bacteria and especially fungus or yeast, candida albicans, out of the body.

You win-when you have more friendly bacteria than bad bacteria.

You lose-when bad bacteria flourish and overtake the gut and damages the endothelial wall.

How do you lose?

#1 *The number one culprit in leaky gut is antibiotics.* Now, before you get on your high horse and say, “The Martin Clinic doesn’t like antibiotics,” let me say this, it’s the double-edged sword.

DOUBLE EDGED SWORD

The greatest discovery of the 20th century in medicine has become the curse of the 21st century. Antibiotics have saved hundreds of millions of lives. Before the advent of antibiotics, people died of infection. Today they die from inflammation.

Antibiotics are the curse of the 21st century. The overuse of antibiotics is the number one reason people suffer from leaky gut.

FIVE DAYS OF ANTIBIOTICS

Just five days of antibiotics will destroy all the good bacteria

in the body. If left unchecked, this allows a huge proliferation of bad bacteria, but worse, it allows an overgrowth of *Candida Albicans* or yeast.

THIRD ARMY-VERY DEADLY

The primary battle is in the gut between good and bad bacteria, but if the good guys are gone or diminished, a third invading army waltzes into the body, called yeast. In medicine, we call it *Candida*, or *Candida Albicans*, which is a fungal infection. With no border guards left to defend the gut-blood barrier, guess what happens? Yeast gets into the bloodstream, becoming systemic, and can spread everywhere.

So that is why, at the Martin Clinic we have said this for many years:

Leaky gut = leaky brain

Leaky gut = leaky skin

Leaky gut = leaky joints

Leaky gut = leaky lungs

Leaky gut = leaky sinuses.

Again, I'm not against antibiotics, but you had better replace your friendly bacteria before and after antibiotic therapy. Otherwise, you are setting yourself up for big time trouble down the road, as I will explain in the following chapters.

CHAPTER NINE

TWO THINGS ABOUT THE GUT

- #1 Microbiome- your friendly bacteria, trillions of them, so intelligent they have their own DNA. It really acts as a separate organ.
- #2 Lining of the gut. Now, both of these are related, but your interstitial wall between your blood and your gut, they're little epithelial cells, and the health of this wall has a lot to do with the health of your microbiome.

A key job for our microbiome is to maintain a healthy gut by nourishing the cells of the wall. The wall is only one cell thick and most of our immune system is just on the other side. So it relies on the micro biome to function at its peak.

Frank Lipman MD

WHAT DOES THE MICROBIOME DO?

- #1 It breaks down food. The #1 cause of food intolerance has to do with the health of the micro biome in your gut.

GLUTEN SMUTTEN

People today suffer from another epidemic, in that they claim to be gluten intolerant. I, by the way, beg to disagree. **It ain't the gluten, it's the bacteria!** **If you have leaky gut there is a high possibility of intolerances to:**

- 1) Gluten
- 2) Wheat
- 3) Dairy
- 4) Eggs
- 5) Lectin

But all of these have one cause, it's called leaky gut.

Kids that are weaned on antibiotics, for example, will almost, invariably, develop food allergies, or intolerances, as they get older. I always look at a child's eyes in my office. If they have dark circles under the eyes, and I tell mommy, "This kid has leaky gut, and you better fix that gut."

IT AIN'T THE DAIRY!

Although we have seen a hundred-fold increase in intolerance to dairy, in this day and age, it really is about the leaky gut. Dairy is not dairy anymore.

When I was a kid, the milkman actually came to deliver right to our door. Now, you'd think I was born in the days of Noah, but I am not kidding you. The milkman delivered milk in the 1950s." Grocery store milk is what I call white Pepsi. Why? Because milk today is all sugar and no fat. Again, because the whole world went hook, line, and sinker

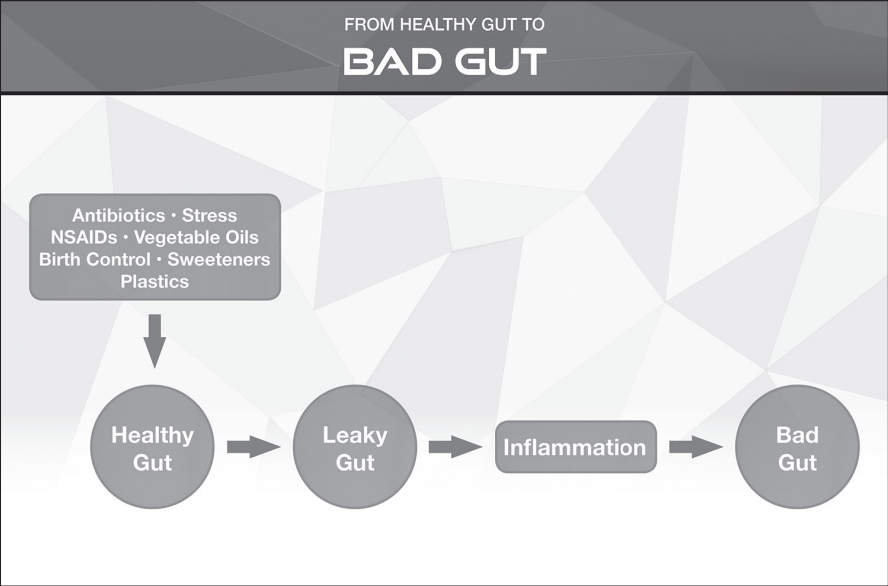

over “fat makes you fat,” and “fat makes cholesterol,” scaring the living lights out of people.

But milk is different today. Go and milk a cow, and you will see that milk is really much more like cream. But by the time it gets to the grocery store, it’s fat free, and now you might as well have had a Pepsi. Add that garbage with cereal, and you might as well give your kid two jelly donuts and a Pepsi for breakfast. So now after my little rant, let’s get back to leaky gut. Fix leaky gut, and you fix food intolerances.

So if you have a kid that has:

- 1) Allergies
- 2) Asthma
- 3) Rashes ➤ 99% sure it is leaky gut
- 4) Joint pain
- 5) Gut pain

#2 Your microbiome produces vitamins and brain chemicals. Do you know that you have more serotonin and dopamine, your feel-good hormones, in your gut than you have in your brain? **No wonder we have so much depression, anxiety, ADD, and ADHD today.** Does it surprise us that we see so much autism today? Every cell in your body needs Vitamins, especially Vitamin D, but you can’t absorb Vitamin D properly without a healthy microbiome.

CHAPTER TEN

THE GUT- BRAIN AXIS

Did you ever hear the slogan, “What happens in Vegas, stays in Vegas?” Well, when it comes to your gut, what happens in the gut travels via the vagus nerve, your 10th cranial nerve, that connects the gut, the transverse colon, to the brainstem.

It is the main nerve of your parasympathetic system. An example of this if you ever get real nervous and you have butterflies in your gut? This is from the vagus nerve. 80% of your signals go from your gut to the brain. Only 20% go the other way. Signals from the gut microbiome tell your brain to produce more neurotransmitters like serotonin, GABA, so the balance of your microbiome has a major effect on your feel-good hormones.

AUTISM

Why do we see so much autism today? Again, look at my medical books back in the 1970s and look for autism. It's not there. The first time I ever heard of autism was in 1978 when a colleague was sharing with me that he had two autistic kids. Wow. I didn't even know what he was talking about. *I am 100% convinced that autism is leaky gut.* The number one cause of autism, in my opinion, is not vaccines. Although, true, when I was a kid children received two vaccines. Now they receive over 70 before the age of two. I have never seen

an autistic child in my office that didn't have severe leaky gut.

Here's what we know about autism. These are the common denominators. (There are exceptions, of course). Mommy of an autistic child.

Mommy of an Autistic child	Baby with Autism
Mommy on antibiotics during, or even a year before pregnancy	Antibiotics in early life
Gestational diabetes (insulin resistance)	C-section baby
Bad diet	Not breast-fed
Obesity	Vaccines

LETS TALK ABOUT C-SECTIONS

We have had a whole generation of women now that have C-sections, and the results are not good. Now here's a disclaimer. C-sections can save both baby's and mom's life, so I'm certainly not against them. However, both in Canada and the USA, obstetricians have been told to cut back on the number of C-sections. Here's why.

MOMMY HAS A C-SECTION

Baby has an increase in:

- ⬆ Allergies
- ⬆ Cancer
- ⬆ Asthma
- ⬆ ADD/ADHD
- ⬆ Autoimmune
- ⬆ Autism

↑ Celiac

↑ Obesity

WHY?

Because baby is meant to go through the birth canal where they will get a good dose of mommy's microbiome. Momma's microbiome is a great starting point for baby's overall health.

CHAPTER ELEVEN

CANDIDA ALBICANS

Candida is a fungus or yeast. There's a small amount present in the gut. However, with the lack of friendly bacteria, probiotics, one can get an overgrowth of Candida in the gut, and this in turn, can sneak through the microscopic lining in the gut to invade the bloodstream.

Possible signs of Candida overgrowth:

1. Chronic fatigue.
2. Difficulty concentrating.
3. Depression.
4. Irritability and mood swings.
5. Digestive issues, heartburn, bloating, diarrhea, constipation.
6. Acne, dry, itchy skin.
7. Rashes.
8. Intense sugar cravings.
9. White coat on the tongue.
10. Chronic congestion or sinusitis/ post nasal drip.
11. Athlete's foot.
12. Headaches.

WHAT ARE THE CAUSES OF CANDIDA OVERGROWTH?

1. Antibiotics
2. NSAIDs, non-steroidal anti-inflammatories, like Aleve, Motrin, Advil, Tylenol.
3. Artificial sweeteners.
4. Chronic stress, high cortisol.
5. Bad eating habits, too much sugar, crappy carbohydrates.

Treatment plan:

1. Diet. Eliminate all sugars and crappy carbs.
2. Take broad spectrum of probiotics with L-rhamnosus and L-reuteri.

PART 3

FREE RADICAL DAMAGE

CHAPTER TWELVE

THE THIRD SEED OF DISEASE - FREE RADICAL DAMAGE

One of the first people to talk about the importance of free radicals was Dr. Denham Harman in the 1950s. His theory was that free radical oxygen molecules acted like kamikaze pilots that **DESTROY NORMAL CELLS**.

Oxygen is something that we can't live without. However, the same oxygen that we rely on to live is going to guarantee that we age and die.

The best example that I can give to you is the apple. Cut it in half and within seconds you will see what I call accelerated aging. Right before your eyeballs, that apple starts to rust out. This mechanism called oxygenation is the same mechanism that makes us age prematurely. Free radicals can be an important part of our defense mechanism. On the other hand, those same free radicals are the same mechanism that will end up killing us.

However, if you take a few drops of lemon juice and sprinkle it on an apple, the rusting out process on the apple is delayed. This is very anti-aging, that is why lemon juice is classified as an anti oxidant.

When God told Adam and Eve not to eat the fruit of the tree in the Garden of Eden. He wasn't kidding. He said, on

that day that you eat it, you will surely die. Now, folks, Adam and Eve should have listened. Since they disobeyed they have cursed the human race with a death wish. Have you ever noted the statistics on death? One out of one dies, 100%. Romans 5:12 “When Adam sinned, sin entered the world. Adam’s sin brought death so death spread to everyone.” The Bible NLT

I believe that because of the sin of disobedience, God cursed the human being with free radicals. You see, Adam and Eve were built to live forever. They were never created to die. Their selfishness caused God to punish the human race with a built in mechanism that will eventually kill each and every one of us.

There are mainly 2 types of free radicals:

1) **OXIDATIVE-RUSTING OUT**

The main causes of oxidative (rusting out) damage to our cells are:

➤ **CHEMICALS**

- over 100,000 new chemicals have been created since World War 2 and the vast majority are found in our homes in the form of plastics, air fresheners and household cleaners etc.

➤ **SMOKING**

- it’s funny but when I was a kid everybody smoked. My dad - second generation Doctor of the Martin Clinic used to smoke 4 packs of cigarettes a day. He would often give patients a cigarette to help with their cough. Isn’t that crazy!! - the dangerous by product of smoking are free radicals in the form of Aldehydes.

Aldehydes are particularly damaging to lung tissue thus so many smokers get lung cancer and COPD.

➤ VEGETABLE OILS

-why is lung cancer still the #1 cancer in North America in spite of the fact that the vast majority of people no longer smoke?

The answer is:

vegetable oils = aldehydes = destroyed lungs

Folks - you don't have to smoke to get lung cancer, just eat crappy carbs like crackers, cookies, chips, margarine, salad dressing or any processed food found in the middle isles of your grocery store. They are made with PUFA- Polyunsaturated Unsaturated Fatty Acids a man-made oil like Canola oil/ Safflower oil / Grapeseed oil and Sunflower oil.

A typical meal of fish and chips fried in vegetable oil, contained as much as 100 to 200 times more toxic aldehydes than the safe daily limit set by the World Health Organization!!

➤ HEAVY METALS

-from mercury to lead, cadmium and aluminum. These heavy metals create an enormous amount of free radicals. We live in a toxic soup today and heavy metals are found in:

- 1) high fructose corn syrup - mercury
- 2) large fish - mercury
- 3) lipstick and make up - lead
- 4) over the counter meds like aspirin - aluminum

5) pots and pans - aluminum

TYPE 2 FREE RADICALS - GLYCATION - AGE'S

Advanced glycation end products or AGE's have been given a good synonym because they literally prematurely age the body. Now what causes premature and aging of the body - SUGAR!! Eating or drinking sugar glycates proteins and lipids and are particularly damaging to:

1) **The Brain**

- AGE's cause amyloid plaquing in the brain which is implicated in memory loss, dementia and Alzheimer's.

2) **The Heart**

- The cardiovascular system ages quickly because of glycation. Blood vessels lose their elasticity because AGE's

3) **Muscles and Joints**

- Sugar is very destructive to joints and muscles because of glycation. Sugar destroys tendons and makes people so much more susceptible to tendinitis, plantar fasciitis and Achilles tendon injuries. Amazing what affect the diet has on the body!! Many of my patients over the years experience tremendous relief from chronic tendinitis and joint pain when they lay off the sugar and did the Reset.

4) **The Skin**

The best anti-aging diet is the Reset Diet - Why? - no sugar. Your skin is the largest organ in the body. It's the visible organ and if you are a bad eater wrinkles and sagging skin will reflect that reality. You want healthy skin? Don't stay away from the sun-stay away from SUGAR!!

Sagging Skin

“Sugar is a direct cause of wrinkled or sagging skin in a process called glycation! Sugar molecules attach to proteins and fats in the body changing the nature and structure of your skin. External result of wrinkles and sagging skin but affects all tissues as well.

Lori Shemek PhD.

PART 4

KINGDOM EATING

CHAPTER THIRTEEN

KINGDOM EATING

There are three kingdoms of food:

1. the Animal kingdom, made up of eggs, meat, fish, dairy.
2. the Plant kingdom, which includes all fruits and veggies, grains like rice, whole wheat, legumes, nuts, seeds.
3. Three, the man-made kingdom, which includes bread, pasta, cereals, sugar, sweets, pastries, muffins, bagels, milk, which is grocery store milk, yogurt, juice, or juice smoothies.

God wants you, and built you, to eat from two kingdoms, the animal kingdom and the plant kingdom.

BAD NEWS

If you are a vegetarian or a vegan, I have bad news for you. You are wrong, and your way of eating only from the plant kingdom will lead to:

1. low energy,
2. loss of bone and muscle mass as you age,
3. you will suffer with more depression and anxiety.

4. For men, you will have lower levels of testosterone and low sperm counts.

I know that vegetarians and vegans are very sincere, but you are sincerely wrong. There is a whole generation of young people today that have bought into the lie of veganism and vegetarianism.

It comes from indoctrination by zealots of climate change and animal lovers. I had a young lady come into my office and say, “Doc, I don’t eat anything that has eyeballs.” First of all, they are not really saving the animals because crops like rice, corn, wheat and soy devastate the environment. They deplete the top soil and kill off every other plant.

The carbon footprint nonsense, where cows’ farts are heating up the planet. Come on now. I just don’t buy it. There were so many that followed guys like Dr. Neal Barnard, Dr. Dean Ornish, even as early as the early 1900s where Dr. Kelloggs, who was a Seventh Day Adventist, and talked about only eating fruits and vegetables, and no animal products.

THE ANIMAL KINGDOM-GOD’S SUPERFOOD

Here are several nutrients that are found only in the animal kingdom that are not in the plant kingdom.

1. **VITAMIN A.** -Beta carotene is found in carrots. Beto-Carotene is a precursor of Vitamin A, not true Vitamin A like pro-retinol A. Pro-retinol A is found in the animal kingdom in eggs, meat, and cheese and not in carrots.
2. **DHA and EPA.** These are long-chain fatty acids. If someone calls you fat head take it as a compliment.

Your brain needs DHA. These are found in fish and steak. By the way, grass-fed beef has more DHA than fish.

3. VITAMIN K2. Plants have K1, which helps to clot the blood, but only eggs, meat, and cheese have Vitamin K2, which actually takes the calcium out of your bloodstream and puts it into the bones where calcium belongs. Calcium taken as a supplement, by the way, is still the number one selling supplement in North America, never gets to the bone. It only stays in the blood to help harden the arteries. Vitamin K2 is essential, and it's not found in the plants. The highest source is in butter and cheese curds.

K1 is found in the plant kingdom and is important in blood clotting. K1 ladies is found in green leafy veggies. I tease women all the time because they love their salad. The truth is salad has K-1 that clots your blood ➤ therefore too much salad increases your risk for heart attacks and stroke. Only K2 decreases your risk of heart disease.

4. Heme iron. Heme iron is essential for your blood to oxygenate the body properly. This is found mostly in organ and red meats. By the way, Popeye didn't get those muscles eating spinach like the cartoon says. He got it from eating steak. Spinach has some iron, but it is not heme iron, which is by far the most bioavailable of all irons.
5. VITAMIN D3. Vitamin D2 is found in plants, and this is the form used to fortify cereals, breads, and milks, but it is poorly absorbed. Vitamin D3 is found in the animal kingdom, so it's in your eggs, meat and cheese.

6. B12. There isn't enough B12 in the plant kingdom to feed a mouse. You will not do well without optimal levels of B12. By the way, B12 is only found in red meat, some in oysters. It is estimated that 40-50 % of the population is low in B12.

Here are several signs of low B12:

- a. B12 makes your nerves work properly, and therefore, people that get numbness and tingling are often low in B12
 - b. Tremors
 - c. Muscle weakness, atrophy, clumsiness
 - d. Brain fog, confusion
 - e. Depression, very common with low levels of B12.
 - f. Your eyes, visual disturbances because of low levels of B12
 - g. Heart palpitations
 - h. Shortness of breath
 - i. Yawning frequently.
-
7. AMINO ACIDS. Vegetarians and vegans miss out on eight essential amino acids, the building blocks of protein. They miss out on real important ones like: L-carnitine, which slows aging:
 - helps you lose weight
 - increase your mental alertness
 - protects your heart
 - boost potency in men
 - enhances exercise
 - helps prevent diabetes.

L-carnosine

-this is a master detox amino acid. Helps to improve and preserve your telomeres, so it is very anti aging
Choline, called the smart nutrient. Again, only found in eggs, meat and cheese.

- Choline builds cell membranes in the brain
- Choline decreases homocysteine, which is a marker for heart disease
- It helps regulate and detox the brain
- It is a precursor to all your B Vitamins.

Symptoms of low choline include:

- memory loss
- muscle pain and weakness
- neuralgia, damage to nerves
- insomnia.

Lysine the virus killer

- Again, only found in eggs, meat and cheese.
- Lysine binds viruses. COVID-19, and the herpes virus that causes shingles, cold sores. Shingles is in epidemic proportions today.
- prevents glycation. Glycation, as we've already seen, destroys blood vessels by calcifying them.

8. **CLA, the fat buster**, found in dairy, butter, cheese. It helps control insulin. It helps elevate your glucagon, which gets rid of fat.
9. **ZINC, The testosterone and immune booster**, only found in eggs, meat and cheese. With all this talk of the COVID virus, zinc hit the mainstream media. Why? Because a lot of doctors found that it really boosts immunity. We have known for years that the zinc lozenges decrease the severity of the

common cold. But zinc is essential in men to make testosterone. *Men, if you have low levels of zinc and you're not eating eggs, meat, and cheese, you are going to have low levels of testosterone.*

Signs of low testosterone:

- ED, (erectile dysfunction)
- weak heart
- hair loss
- poor sleep
- fatigue, especially late afternoon or after supper
- reduced muscle mass
- increase in body fat
- depression in men

CHAPTER FOURTEEN

MAN-MADE FOODS

Mankind can and has accomplished marvelous things. Man can be so innovative and clever, these characteristics differentiate us from the animals. So, when it comes to food, we learned that fertilizers can help give us abundant crops. But man left to his own devices have a tendency to change things away from God's natural basics to man-made modifications that are not always beneficial to our health, but often fatten up the wallets of the food companies.

What has man changed in our food system:

1. they changed the flour
2. they changed the fat.
3. they changed the sugar
4. they changed the milk
5. they changed our breakfast
6. they changed our thinking.

1. THEY CHANGED OUR BREAD

“Man shall not live on bread alone, but every word that proceeds from the mouth of the Lord.” (Matthew 4:4)

Who doesn't love bread? You give me bread and peanut butter and I could live on that. But bread today is not the bread of 100 years ago. The food industry changed the flour.

Before 1870 all bread was made by stone grinding it.
Stone milled bread crushed the wheat germ and released the oils.

The bread before 1870 was high in:

protein
folic acid,
B Vitamins
carotene
antioxidants

BY 1880- THE FIRST FAST FOOD

The flour industry had replaced all stones with steel or porcelain rollers. Rolling removed the wheat germ and fiber, leaving behind a big packet of nothing but starch and, with it,

- very little protein
- all carbs
- no nutrients
- no B Vitamins
- no folic acid
- no antioxidants

Only in 1930 did the food industry introduce enriched bread, which was fake and poorly absorbed Vitamins added to bread.

2. THEY CHANGED THE FATS

Nature never makes bad fats only factories do.

Good fat in nature	Bad fat (made in factories)
Butter	Canola
Tallow	Soybean
Lard	Sunflower
Palm Oil	Corn
Coconut oil	Safflower
Avocado Oil	Grapeseed
Olive oil	Margarine

In the chapter on free radicals and inflammation, we talk about man-made fats.

The primary source of fat in the early 1900s was natural fat like butter and lard and heart disease killed about 10% of the population. Today, after the advent of Crisco, you had factory oils. Now, you have 40 to 50% of the population with some form of heart disease.

THE WOLF IN SHEEPS CLOTHING - PUFA's

The advent of Crisco was really the start of hydrogenated highly industrialized fat that is man-made. The middle aisles of your grocery store are made up of packaged goods containing these seed oils, they called them vegetable oils.

These oils are cheap and made from canola, corn, cotton seed, rice, bran, soy, and they are so unhealthy. Why?

1. they elevate your levels of omega-6, this disrupts omega-6 to omega-3 levels. We are now at a level of about 20 or 30:1 omega-6:omega-3 ratio.

High omega-6 to low omega-3 = inflammation.

2. they disrupt your gut's microbiome, helping to create leaky gut
3. they glycate your blood vessels and tissue causing enormous amount of free radical oxidation and inflammation to the cardiovascular system
4. they are major factors in autoimmune diseases like MS, rheumatoid arthritis, Crohn's, lupus. Here are some of the list of foods in those middle aisles of the grocery stores. The store-bought cookies, crackers, cakes, pastries, donuts, bagels and muffins.
5. PUFA's damages the thyroid:
 - Blocking thyroid from releasing TSH.
 - Blocking the transport of TSH to the cells.
 - Blocks the liver from converting T4-T3
6. The average person consumes 51.9 pounds of this garbage oil a year. In the 70s we were consuming 15 pounds a year.

3. THEY CHANGED THE SUGAR

As we have discussed previously, the discovery of high fructose corn syrup, man-made sugar, that is metabolized in the liver, this stuff is so toxic. Never go near it.

4. THEY CHANGED THE MILK

Grocery store milk is what I call white Pepsi. Man made milk in the grocery store is a lot different than what comes out of a cow.

I always say, if you have a cow in the backyard then drink milk. Otherwise, don't touch it with a hundred foot pole. Ever notice that so many people today are lactose intolerant?

Probably 60% of the population. You know why? Because man has denatured milk. I remember as a kid that the milkman used to deliver milk to our house. In the 1950s, they still had horses pulling the milk carts. Okay, I'm not a hundred years old, but that's the truth. The milk would come in glass bottles that you literally had to shake for several seconds in order to blend all the cream on the top into the rest of the bottle.

Now folks, that is what milk is supposed to be like, full of fat. The fat phobia, but once again, the dairy companies that thought they were smarter than God and since fat makes you fat and fat makes cholesterol and cholesterol is bad for you, yada yada yada, they made grocery store milk like skim, 1% and 2%. All white Pepsi. Because when you eliminate fat, you are left with all the lactose and that's where all the problems with dairy are today. Today's milk leads to:

- ALLERGIES

Often times with kids especially, they either get digestive issues or sinus problems. Then as soon as they eliminate milk, all this goes away. The milk produces an enormous amount of mucus.

-DIABETES AND OBESITY

White Pepsi sets up children for obesity and diabetes. Breastfeed the kids as long as possible, and when they are done breastfeeding, wean them on water, not on garbage milk. Listen, I am the farmer's best friend, but farmers were hijacked by the food industry to change nature.

CHEESE ISN'T MILK

The reason I like cheese is because it is a very low carb food with no added sugar. Now, some people can't take the casein, the protein found in cheese. So listen to your body. If you can't digest cheese, that's because you have leaky gut.

5. THEY CHANGED OUR BREAKFAST

You have to give it to the food industry. Man, their marketing strategy is genius. Books should be written how the cereal companies used a lie to promote their garbage product.

ANCEL KEYS #1 SERIAL (CEREAL) KILLER OF ALL TIME!!!!

Ancel Keys said that fat caused cholesterol and cholesterol caused heart disease, and the world went for it hook, line, and sinker. Ancel Keys really single-handedly gave big food companies, and especially Kellogg's, Post, General Foods, a gift that keeps on giving today. Keys said that cholesterol was at the root of heart disease. He suggested that cholesterol from eating animal products was killing people, while the cereal companies jumped on this big time. They started the mantra, "Quit eating bacon and eggs for breakfast these are dangerous, will elevate your cholesterol. So eat our cholesterol-free cereals."

"Frosted Flakes are great," said Tony the Tiger. "Cheerios are good for you." As a matter of fact, the American Heart Association put a heart on the box of Cheerios. You know why? Because if you eat that garbage, you will have a heart attack.

CEREAL COMPANIES LIED AND PEOPLE DIED

Cholesterol is never at the root of heart disease, but if you took a survey in your hometown, go to 100 doors, ask people what causes heart disease, 99 out of 100 will tell you it's cholesterol.

I tell you, when big pharma and big foods get together, they literally made up the cholesterol hoax, and society went for it!

Lipitor, which is a cholesterol-lowering medication, is the number one selling drug of all time. Nobody dies of a heart attack or stroke from high cholesterol, strokes and heart attacks come from inflammation due primarily to elevated insulin.

“There is no evidence that high levels of total cholesterol or of “bad” cholesterol cause heart disease, according to a new paper by 17 international physicians based on a review of patient data of almost 1.3 million people.”

Dr Zoe Harcombe

So guess what? People who think bacon and eggs are bad for them change their diets and change their morning meal.

Can we all agree that olive oil is good for you? Yep. Well, what makes olive oil good for you is oleic acid. Guess what makes bacon good for you? Oleic acid. Bacon, olive oil. Both good for your heart and brain. I like bacon better, don't you?

6. THEY CHANGED OUR THINKING

The food and pharmaceutical industry are marketing geniuses. This is well established. One of our politicians was once talking about climate change and she said, “If you say a lie enough times, people will start believing it. So just keep repeating, keep repeating the lie.” You don't want to get me going on politicians, but they learned this from the marketing geniuses at the food and drug companies.

So here are some of the lies that they keep repeating:

- **cholesterol is the boogeyman** - eat cereals and margarine instead of butter, eggs, meat, and cheese.

- **the sun is the boogeyman**, so put on sunscreen and stay out of the sun- it causes cancer.

-**red meat is bad for you** -it causes cancer. “Eat our high-carb foods,” they will tell us. **“Eat our meatless burgers.” I wouldn't give you a plug nickel for a meatless burger, and**

I wouldn't give it to my dog, either. As a matter of fact, dogs know better. They wouldn't even eat that garbage.

-breakfast is the most important meal of the day - “So eat our cereals and crappy yogurt.” **Yogurt, by the way, is the number one North American breakfast for women.**

Low-fat yogurt. Wow. How bad is that for you?

- fiber is good for you - Having a big poop every day keeps you healthy, and, by the way, fiber lowers your cholesterol. What nonsense.

- eat several times a day - You need to eat frequently to keep your blood sugar and energy level. That is another lie brought to you by the food industry.

- whole wheat is healthy - No it isn't. Whole wheat or white flour will be turned into sugar in five seconds. So neither one is good for you. They both elevate your insulin rapidly.

- protein is hard on the kidneys - Nothing could be farther from the truth. Healthy kidneys are subject to two main things. **One is insulin**, so lower your carbs and sugars, and, **two, dehydration, not drinking enough water.**

Here are six signs that you're not eating enough protein:

- brittle nails
- sarcopenia (muscle wasting)
- weakness
- always catching a cold
- osteoporosis
- brittle or thinning hair (hair is 99% protein)

- salt causes high blood pressure - once again, another lie. Sugar and insulin resistance cause high blood pressure.

Salt carries nutrients across cell membranes to your kidneys, heart, and liver. We cry salt, our tears. Our blood is salty.

We eat by the food pyramid. We die by the food pyramid.

We look like the food pyramid.

Doctor Gary Fettke
Orthopedic Surgeon

Without salt, we elevate our insulin. Switch your salt to Himalayan pink salt, real salt compared to table salt. **Don't blame salt for what sugar has done.**

- **eat six to eight servings of fruits and veggies a day** - you know why cows eat grass all day? Because they have **four** stomachs to digest grass!!! Salad is glorified grass, ladies. You only have one stomach.

An apple a day keeps the Doctor away - Not anymore it doesn't.

When you have high circulating insulin then don't be fooled by living on fruit. I call fruit GOD'S CANDIES-limit them because even fruit will elevate insulin and uric acid levels.

Fruits and vegetables are overrated. Be careful with insoluble fiber. Do you know what insoluble means? You can't digest it. Why would you eat what you can't digest!!! So be careful with:

- 1) greens, spinach, lettuce, kale
- 2) whole peas, green beans
- 3) kernel corn
- 4) bell peppers

- 5) eggplant
- 6) celery
- 7) onions, garlic, leeks
- 8) cabbage
- 9) broccoli
- 10) cauliflower

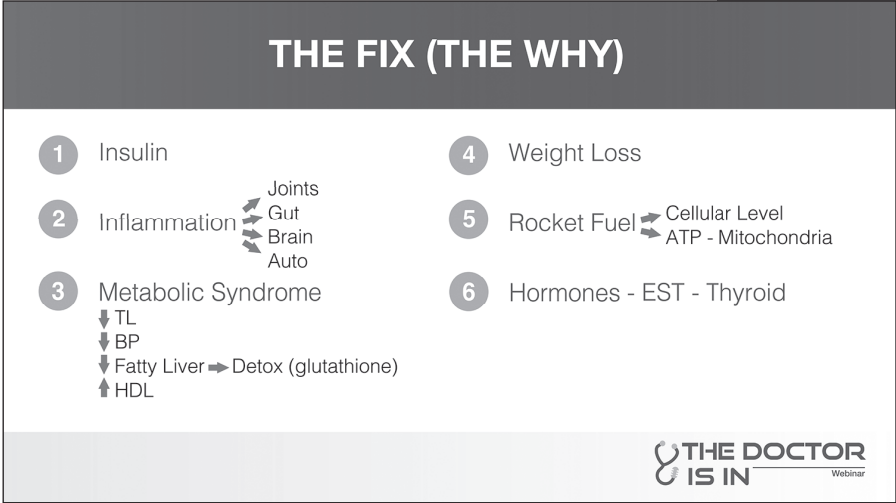

Avoid these like the plague if you have IBS, gas, bloating, diverticulosis, and ulcerative colitis.

- **coffee is not good for you** - “tea is better,” they say. “Coffee is acidic.” How stupid. Coffee dehydrates you. **Folks, coffee is Vitamin C on the Martin Clinic alphabet.** Why? It is antiaging. It is anti anticardio. It stabilizes blood sugar. In this day and age, it acts like Metformin, the diabetic drug, so have it before or with your meals. Here’s a saying of mine. “Lord, if I can’t drink coffee, take me home.” And someone asked me, “How about tea?” “Well,” I said, “why drink tea when you can drink coffee?”

PART 5

METABOLIC RESET

CHAPTER FIFTEEN

THE METABOLIC RESET - FASTING WITHOUT FASTING

The Martin Clinic Metabolic Reset is a 30-day eating program to actually reset your metabolism. The program has been used by thousands of our patients over the last several years.

HOW DID IT START?

I started using this eating program with diabetic patients in order to get them off the Titanic. Diabetics are on course to die young from heart disease, stroke, cancer, and Alzheimer’s. Drugs for diabetes are meant to manage the disease, whereas this eating program gets them off the death ship on to a new lease on life.

One particular early success story of this 30-day eating program was a patient who actually was in ketoacidosis, which is very dangerous. Her sugars were at 25. Within one week of starting this eating program, she was down to blood sugars of seven. Within two weeks she was in complete normal range without any medication.

SIMPLE BUT NOT EASY!

This program is simple. You eat eggs, meat, and cheese for 30 days, fish included. No fruits, no veggies, no carbs whatsoever. Now, if you are a carba-holic, this is not easy, but it's simple.

After a few months of using this on hundreds of diabetic patients, I started to implement the program with all my metabolically challenged patients. The results were astounding.

HERE IS WHAT HAPPENS ON THE RESET - YOU WILL BE FASTING WITHOUT FASTING!

Yes, eating eggs, meat and cheese will mimic fasting and all of its benefits.

1) Weight loss /Weight gain

For the vast majority of North Americans, weight loss is their number one goal. This is not a weight loss diet per se, but yes, if you need to lose weight, there is not a better and healthier program than this one. If you need to gain weight, then this is the program for you, because the diet is so nutrient dense that you will now build muscle not fat.

2) It fixes your metabolic syndrome in 30 days.

Save your pancreas, save your life. For 30 days your pancreas is going to take a well-deserved holiday. Metabolic syndrome is caused by eating too many carbs and sugar, which created the journey on the Titanic in the first place, and we call that metabolic syndrome. 88% of the population have metabolic syndrome. So in 30 days you will:

- decrease your blood pressure
- decrease your blood sugar
- decrease your insulin resistance
- increase your HDL, which is good cholesterol
- decrease your triglycerides, which are dangerous lipids that are at the root of heart disease and stroke
- decrease fatty liver
- decrease uric acid.
- decrease visceral fat, dangerous fat around the organs.

3) It reduces all markers of inflammation

Now, inflammation according to many experts is that the root of most modern day diseases like heart disease, cancer, Alzheimer's, diabetes, autoimmune.

INFLAMMATION IS NOT HOUDINI

Inflammation is not the root of the disease, but rather the result of high-circulating insulin, leaky gut, and free radical or oxidation

INFLAMMATION-GOOD GUY-BAD GUY

Inflammation is the body's ambulance system to respond to injury or infection. If you have an injury, you want your blood to bring extra protein and enzymes to repair the site. If you have an infection, you want a fever to bring heat and T cells, the Navy SEALs of your white blood cells to the party to whip the bacteria or virus out of your body.

WHAT DOES INFLAMMATION FEEL LIKE?

Ever had a cold or a flu? That pathogen is so small you can hardly see it with an electron microscope, but wow, the headache, the pain, achy all over, feeling like you got hit by a truck. This is not the virus, but the body's response to the bug called inflammation.

INFLAMMATION GONE BAD

If you scraped your knee or scratched your toe, your inflammation messengers called cytokines tell your liver to release inflammatory mediators like CRP, C-reactive protein, or serum amyloid A to begin repair. So far, no problem. The damaged tissue is repaired pretty quickly and the body goes back to normal.

However, if these messengers stay in the bloodstream for a long period of time due to:

- 1) chronic low grade infection like leaky gut, which creates yeast and candida.
- 2) high- circulating insulin due to high sugars and carb diet.

3) obesity, fat cells release chemicals that constantly put the body into an inflammatory state.

4) sticky blood. Dehydration causes sticky blood, thus creating inflammation.

5) high Omega-6 levels due to eating crappy carbohydrates and especially the vegetable oils in packaged goods.

CAUSES OF HIGH HOMOCYSTEINE

- 1 Low B12
- 2 High Insulin
- 3 Low Thyroid Hormones

 THE DOCTOR
IS IN Webinar

6) Free radicals caused by chemical onslaught from plastics, to perfumes, to air fresheners, to sunscreen, to household cleaners. These all elevate inflammation markers in the body.

In four weeks, all inflammation markers are reduced:

↓ decreased c-reactive protein

↓ decreased homocysteine

↓ decreased Interleukin-6

↓ decreased fibrinogen

↓ decreased uric acid

↓ serum ferritin (thick blood due to dehydration/fatty liver

4) FIXES THE G.I. TRACT

One of the greatest benefits of this program is what it does to restore **THE GUT**:

- **fixes acid reflux**
- **fixes bloating and gas.**
- **fixes candida albicans (yeast)**
- **fixes SIBO - small intestine bacterial infection**
- **fixes H pylori**
- **fixes inflammatory conditions of the gut** like diverticulosis, ulcerative colitis, IBD, inflammatory bowel disease, and IBS.

5) IT FIRES UP THE IMMUNE SYSTEM

- it increases the T cell activity, the Navy SEALS of your white blood cells.

- it helps heal and restore leaky gut, the microbiome where 80% of the immune system is found.

- it helps repair the endothelial wall in the gut, repairing the blood gut barrier in leaky gut. This stops unwanted bacteria, viruses and pathogens from entering your blood stream.

6) IT DECREASES OXIDATIVE STRESS (PREMATURE AGING OF THE BODY)

The 30-day anti-aging program decreases your AGEs, your glycation.

- it increases your telomere length. All of these things help with decreasing the rapid aging of the body

7) IT RESTORES YOUR MEMORY CENTER IN THE BRAIN

- it helps regenerate the hippocampus and your brain cells.

8) IT HELPS MITOCHONDRIAL REGENERATION

- due to change in the fuel, the mitochondria, your cells' battery packs, fire on all cylinders and release high octane ATP. If you have chronic fatigue syndrome this reset is a game changer!

9) IT CLEANS THE LIVER

- this 30-day program empties the liver of fat. When you empty the liver, you get the most beneficial detox.

WHEN YOU RESTORE THE LIVER FUNCTION

- the liver is the number one detox organ in the body. A clean liver is able to remove toxins, heavy metals and other debris from the body.

- a healthy liver produces high levels of glutathione. Glutathione is the master detox substance like Velcro in your blood stream that attacks cancer cells and takes heavy metals and other garbage out of your blood.

- the vast majority of hormones, especially for the thyroid, are made in the liver. The thyroid needs the conversion of T4 to T3 in order for it to work at optimal levels.

Fatty liver equals poor functioning thyroid. The thyroid, the body's gas pedal and the body's thermostat, requires a

healthy liver. A restored liver produces high HDL, the FedEx trucks, the good cholesterol on the highways of your blood vessels that pick up the bad lipids called triglycerides.

10) IT RESTORES THE KIDNEYS

- healthy kidneys depend on three things:

- 1) low insulin
- 2) good hydration
- 3) low oxalates (which comes from fruits and vegetables)

✿ When you consume no sugar and drink lots of water, and lower consumption of fruits and vegetables, this is nature's best kidney flush.

11) SLEEP

When you decrease inflammation and decrease insulin, you get a great sleep benefits. I've actually proven to patients that I've been able to shrink their tongue. Yes, the size of the tongue has a big effect on sleep apnea and snoring.

12) CANCER

Anyone who wants to prevent cancer or anyone who has cancer, this 30 day eating program is for you. It's a no brainer. Remember, as we've discussed earlier in the book, cancer needs fuel and it lives on sugar. This diet is so good and it helps to regenerate your body, especially with the immune system. It supercharges your immune cancer fighting T cells and NK cells. Another reason the reset is so good in the

battle against cancer because it elevates glutathione. In my opinion glutathione is a great cancer killer.

13) AUTOIMMUNE DISORDERS

The metabolic reset is a great way to battle autoimmune disorders. When you lower inflammation and fix leaky gut patients find a good improvement in autoimmune symptoms in disorders such as:

Celiac	Muscular Sclerosis
Chron's	Rheumatoid Arthritis
Ulcerative Colitis	Sjogren's Syndrome
Autism	Psoriatic Arthritis
Fibromyalgia	Parkinson's

14) HAIR, NAILS AND SKIN

The Reset really helps with hair loss, brittle nails and sagging skin. In just 30 days patients started to see healthy hair again. Ladies, hair is 99% protein and far too many of you never eat enough. Your hair and nails depend on protein intake.

As stated in the chapter on free radicals glycation produced by consuming sugar is a major contributor to sagging and wrinkled skin. It's amazing how fast your skin will show vitality on the Reset.

CHAPTER SIXTEEN

WHY EGGS, MEAT AND CHEESE?

These foods are nutrient-dense. They provide all the fuel your cells need

-the mitochondria, your cells' battery packs, love this fuel. Go out to your local airport. Watch the fuel trucks fill those planes. They're not using 87 to 93 octane, the fuel that your car runs on. They use jet fuel, 100% octane. Well, eggs, meat, and cheese are jet fuel for your cells. Carbs and sugars are dirty fuel for the body.

Why not fruits and vegetables? When you take 30 days off from fruits and vegetables, you are eliminating:

- 1) all sugars, even fructose that stresses the liver.
- 2) you're eliminating all lectins that stress the gut.
- 3) you're eliminating all oxalates that stress kidneys and the gallbladder.
- 4) you're eliminating all cellulose that irritates the gut.
- 5) you're eliminating all insoluble fibers that irritate the gut.
- 6) you're eliminating all gluten that creates inflammation and is a factor in auto immune disorders.

Vegetarians are 3x more likely to have IBS!

Eggs, meat, and cheese are high in cholesterol.

Remember, cholesterol is not the boogeyman. Big pharma and the big food industry make it out to be. But cholesterol is only found in the animal kingdom.

Saturated fat is good for you:

- 1) good for cells
- 2) good for bones
- 3) good for heart
- 4) protects liver - takes toxins out of body
- 5) good for kidneys
- 6) good for immune system
- 7) improves absorption of fat soluble Vitamins A, D, E, K, DHA and EPA

God Doesn't Trust You To Eat Enough Cholesterol

So the liver produces 85% of your cholesterol. Your job is to make up 15% from food.

CHOLESTEROL IS ESSENTIAL FOR:

- **BRAIN**- If someone calls you fat head, take it as a compliment

- **CELL REGENERATION** - The vast majority of the cells in the body are made up of cholesterol, including the outer wall of the cell membrane, and you don't regenerate cells without high levels of intake of cholesterol.

- **CHOLESTEROL ELEVATES HDL** - Good cholesterol, good HDL, removes dangerous triglycerides from your body. So you are really doing something very important for your heart and brain when you lower triglycerides.

- CHOLESTEROL IS THE KEY COMPONENT OF BILE - Bile is important for good gut health. Bile helps kill yeast, candida bacteria, entering the gut. Bile helps to emulsify fat for energy. Bile helps to absorb fat soluble Vitamins like A and D.

Eggs, meat and cheese increase your Vitamin D

None of the body's cells work properly without Vitamin D. The absorbable Vitamin D3 is only found in eggs, meat, and cheese.

CoQ10

Your body makes CoQ10, which is essential for muscle mitochondria to function properly. Just a reminder that your heart is a muscle, and CoQ10 is a byproduct of eggs, meat, and cheese.

Vitamin A - The Invisible Mask

Vitamin A is like the Rodney Dangerfield of Vitamins. It never gets much respect. Vitamin A, Pro Retinol A, is only found in the animal kingdom. Vitamin A protects your sinuses, mouth, and eyes. It's your invisible shield to keep bacteria and viruses out. Of course, we are all going through COVID-19. We are told not to touch your face and make sure we are wearing a mask. The best mask you can wear against Covid or any other virus or bacteria is Vitamin A found in eggs, meat and cheese.

Heme Iron

Found in red meat. Only heme iron is absorbable, and only heme iron makes healthy red blood cells. Healthy red blood cells increases the oxygen level in your body and in your brain.

Vitamin B12

We've already discussed this in length the importance of B12, which is only found in red meat. So eat your steak, Vitamin S.

Vitamin K2

Nothing helps atherosclerosis like K2, which is found in eggs, meat and cheese, and the highest source in cheese curds.

TESTIMONIALS

Happy to report on day 16 of Reset!!! I am down 12 pounds, have energy to sell and mental focus like I was 20 years old again. My mom even commented “it almost feels like you have been sleeping for five years and just woke up” Thank you from the bottom of my heart Dr Martin.

≈

We did it. I follow through with this reset for four weeks and it is a complete success. I feel like I just graduated. I have never felt better and lighter. My energy level is up. My weight went down. 9.9 pounds. I will continue to eat eggs, meat and cheese but will slowly add fruit and vegetables. My goal is to pick and choose the right food that is good for me. I now know what works. Thank you Dr. Martin. I wish everyone continue success.

≈

I lost 14 pounds on Reset -sleep better and less pain in my body.

≈

Good morning everyone I'm doing very good since I've been on reset program. My sugar is reading 6 or 6.5 every day. I lost 7 pounds never felt like this for a long time. I want to say thank you to Dr Martin he has sure helped me. After my four weeks I hope to stay this way with my sugar.

≈

29th day on reset and feel great!!! No more pain in my leg and knee!! Thank you Dr Martin

Do the Reset- do it for yourself. I fully committed, even avoided the fresh asparagus from my patch. I lost 12 pounds, am sleeping better, inflammation, especially in my knees reduced. My constant muscle aches and brain fog of fibromyalgia is gone.

≈

Blood pressure down. Blood sugar normal, I lost 35 pounds. Painful joints gone, energy back. This is not a diet it is a life changer!! God bless you Dr Martin for helping so many of us start enjoying great health again!!

≈

Just finished my 30 day reset and lost 12 pounds. Even more exciting is the way I have been feeling. No more daily headaches! migraines and no more bloated feeling. I no longer crave ice cream, chocolate and all other junk foods I used to think I couldn't go without.

≈

Day 18 and I'm back in clothes that I haven't been able to wear since seven years ago (before I had three babies). More energy, so much less brain fog and more stable mood. For those struggling, you've got this!! Good things are on the way.

≈

Today is day 30, what can I say? I feel so much better, I am down 10.5 pounds which is awesome! I wanted to do this Reset as I know I was in with Dr Martin calls a metabolic storm!! I know my body needed to heal from within. My low thyroid was kicking my butt even well taking meds and with my metabolism so sluggish and food sensitivities.

I am on day 6. I weighed myself this morning... down 11.5 lbs... I feel great no cravings, no measuring or calorie counting, this is just what I needed.

≈

I tested positive for Covid virus today as a working nurse. I am 62 years old and I feel great thus far. I personally believe it's due to my diet change of eggs, meat and cheese. I have lost 38 pounds.

≈

I am so thankful and amazed that my path finally led to Dr Martin. This is the first time in 30 years that I feel in control of my arthritis. My feet don't hurt when they hit the floor in the morning and the swelling is gone in my hands.

28 days done in and down 10 pounds, feeling great!! Not hard to do. I am going to do 28 more. Energy increased and not hungry Thanks Dr Martin

≈

Just finished June Reset lost 26 pounds! Thank you Dr Martin

≈

After reset my doctor checked my glaucoma and the pressure in my eyes were down to 10. Cut in half. Thanks to you Dr Martin

≈

On day 10. Down 5.5 pounds. Less stomach issues. Skin and hair is way better. No cravings for junk food. Enjoying the journey.

≈

I lost 11 pounds I have been on the reset for almost 2 weeks I feel great.

Yay!! Day 30 today!! These are the benefits that I have seen since starting the reset: Way more energy - sleeping better at night and waking up energized and not tired - lost 14lbs - no longer craving junk food - mind is clearer, no more brain fog - easy to follow routine - toe fungus completely gone - have a more positive outlook on life - no more trouble breathing when climbing two flights of stairs in my house - and last but not least, I have better control on anger - this was all possible because of all the help, great advice and some recipes, and especially Dr Martin's daily live Facebook...

≈

My husband (80 years old) and I (68 years old) have been on Reset diet for 6 days now and I have a question about diabetes. My A1C a year ago was flagged at 5.8 and my husband's A1C was 6.4 in March 2020. I decided to check on levels tonight (on personal ACCU-CHEK monitor). My A1C reading is 4.9 and my husband's is 4.7. Is there an error with my monitor or can this be true??? My husband has been off all medications for over two years now including Metformin. About 3 years ago I became a patient of Dr Martin and my husband about a year ago.

≈

I did my final weigh in this morning and pleased to announce that I am down 15.7 lbs in four weeks!!! I had one weak moment through the four weeks but otherwise stayed the course. It was one of the easiest to stick to. Thank you ladies and Dr Martin for all your tips and recipes along the way. I plan on doing keto 4 days a week and reset 3 days a week. Doing some low to no carb cycling including intermittent fasting. Thanks for the kick in the butt to get started on this lifestyle!!!

Absolutely simple but effective. Down 11 pounds since Monday. It's crazy!

≈

Day 11 and down 9 lbs this am feeling great with more energy every day. So thankful for this group!

≈

Finished the reset, feeling great, lost 12 lbs. Will continue to mostly stay on reset. Thank you to all supporters and especially the Martin Clinic for the encouragement. 1st time I have followed any plan this long and found it relatively easy.

≈

I just finished 3rd week of reset and something very strange happened this morning. First let me tell you that I've had depression and I've taken medication for the last 30 years to keep me afloat. This last year the doc increased the dose as I just wasn't doing well... so with the increase I really haven't been feeling anything at all. So back to this morning... I experienced a mood change....one of sheer blissful joy....I let it wash over me remembering the time in childhood and summer skipping along the road happy just to be skipping on the road. I was free then and joyful. This is what I experienced this morning at 60 years of age... are there more feelings of pure joy coming....is this reset way of eating the answer after so many years of misery?

≈

I suffered for months with Calcified shoulder. Months of physio, then a cortisone shot with very little relief. Cut SUGAR out of my diet, and did the RESET. All pain gone, and total movement back in my shoulder... YIPEE!

Today is day 30 for me on Reset! Yay I did it and I feel amazing and proud of myself for pushing through. My body has adapted so well that I will be continuing a little longer. I have lost 17 pounds but more importantly, my energy and my mental focus are back and that is an ultimate win for me!

≈

I finished the 30 day reset. I've lost 20 pounds and I am feeling great! Before I found out about Dr Martin I was experiencing pain in my one leg and knee as well as in my big toe. I couldn't even kneel the pain was so bad. At bedtime my leg would ache and I would toss and turn all night and never get a good night sleep I would be tired come morning. Thank God those days are over- no more pain!!!

≈

Just finished my 30 day reset and lost 12 pounds,. Even more exciting is the way I have been feeling. No more daily headaches! migraines and no more bloated feeling. I no longer crave ice cream, chocolate and all other junk foods I used to think I couldn't go without.

≈

I was diagnosed with high blood pressure and borderline cholesterol and my doctor wanted to put me on meds. I asked him to give me one month, he wasn't impressed especially with my family history. I did the Reset and all my levels came back to normal. Here are extra benefits of the Reset- I felt so good and energized, my menopausal symptoms disappeared, no heartburn and all my chronic muscle pain went away. Just finished June Reset lost 26 pounds! Thank you Dr Martin

≈

We are celebrating today. Yesterday was our last day of Reset. We made it!! We feel great!! More energy, no acid reflux

significant reduction in arthritic pain. Thank you Dr Martin and team. Also both my husband and I lost weight.

≈

You named the diet, I tried it. If Keto wasn't right for me. I was starving all the time. The Reset is a Godsend!

CHAPTER EIGHTEEN

TIPS ON THE RESET / AFTER RESET

1) There is no counting involved. Don't count calories, don't count points, just stick to eating animal protein and fat - eggs, meat and cheese. This is about what you are eating!!

2) Try and implement intermittent fasting. Remember that the Reset is fasting without fasting You are giving your pancreas secreting insulin and your liver a holiday. These two main organs which affect your heart, brain, gut, hormones and especially the thyroid are taking a well-deserved break.

Almost all people who have done the Reset found they didn't need to snack. When you eat the right nutrient dense foods your cells are no longer starving. Here are some tips on implementing intermittent fasting:

3) If you can stop eating by 6 PM and try not to eat till the next day till noon. This is an 18 hour fast - some love this - fasting every day or five days a week or three days a week.

WHAT ARE THE BENEFITS OF INTERMITTENT FASTING?

- 1) lowers insulin resistance
- 2) empties is the liver even more rapidly
- 3) lowers inflammation

4) increases autophagy - this big word means your body is self (auto) cleaning. This is the night shift cleaning away debris from your body while you sleep. A big part of this self cleaning occurs in the brain while you sleep and fast. The cleanup crew in the brain are called GLIAL cells. They restore brain function and regeneration while you are resting.

CAN I SNACK?

Yes you can snack though most people after a few weeks on the Reset don't feel the need anymore. But for hypoglycemics or diabetics you may need a snack. The snack ideas are in the menu section at the end of the book.

WHAT DO I EAT AFTER I FINISH THE RESET?

Obviously it's highly recommended that you don't go back to old habits of living on crappy carbs.

1) Try and stay away from sugar all together.

2) You can eat fruits and veggies but again make eating animal protein and fat eggs, meat and cheese your main sources of food.

3) Enjoy a plate of pasta or pizza once a week. But cut back on the noodles and crust and live on the meatballs, sausages, pepperoni and cheese (only eat the toppings after the first piece of pizza and leave the crust in the dish).

4) Most folks after the Reset reward themselves but they find if they eat too many carbs they don't feel good. I love that - at the cellular level your cells scream - "what the heck did you just feed me"!! I like eggs, meat and cheese, high-octane food - quit feeding me that crap! (it's amazing how smart the body is once you have introduced it to rocket fuel.)

It hates the crappy fuel!

LISTEN TO THE DOCTOR IS IN PODCAST

Why? I constantly pump your tires on why this is a lifestyle change and not just a diet. I will constantly remind you to keep sticking with the program and that eating the right foods is the most important thing you can do for your health.

FORMING NEW HABITS

I took just enough human psychology in university to be dangerous LOL - but this is what I learned:

1) It takes three weeks to form a habit that is why the gyms are full in January and empty in February. Most people quit before they have formed a habit.

2) The 30 day Reset will give you a great new habit so reinforce it every day!

3) Make this style of eating a lifestyle - reinforce it by constantly learning and reading.

4) Share this with others. Sharing and educating others - like your loved ones and friends is good for them but it also keeps you accountable.

5) Join like-minded people in our private Martin Clinic Facebook group.

HOW OFTEN SHOULD I DO THE RESET?

I recommend even for the healthy metabolically to do Reset once a year. But there is absolutely nothing wrong with doing the Reset as often as one likes. My patients who have battled cancer, autoimmune issues and diabetes often stay on the

Reset program all year long they feel so good. Many have said “I am scared to eat crap again, I feel so good.”

HOW WILL I GET MY VITAMIN C?

The other Vitamin C - ascorbic acid won Linus Pauling a Nobel Peace Prize in medicine. He was real big on Vitamin C. The problem with Vitamin C is that you need to take it in high doses or preferably intravenously for it to be effective.

I personally prefer the Vitamin C - like nutrients like polyphenol and phenolic acid found in coffee.

Remember too Vitamin C has a similar molecular structure of sugar. If you drink a glass of orange juice for your Vitamin C which most kids and seniors do the body will take up the sugar and literally excrete the Vitamin C.

Your body needs very little Vitamin C especially as you lower your carbs and sugars.

I HEAR THAT TOO MUCH PROTEIN IS HARD ON THE KIDNEYS?

Nothing is further from the truth! The more eggs, meat and cheese you eat the better it is for your kidneys. The kidneys are damaged by elevated or high circulating insulin - just ask any diabetic.

WHY AM I NOT HAVING AS MANY BOWEL MOVEMENTS ON THE RESET?

Don't be concerned with having fewer bowel movements on the Reset. Just make sure you are drinking enough water.

The Reset foods are so nutrient dense that your body will have very little waste to dispose of.

WHAT AGES CAN DO THE RESET?

The reset is any age friendly. There are no side effects to perfect nutrition!

RESET MENU IDEAS

PURPOSE OF RESET

- for a period of 4 weeks avoid if at all possible the use of artificial sweeteners
- the goal is to metabolically reset your body and clean the liver for a tremendous detox.

FOODS ALLOWED-EGGS, MEAT AND CHEESE

EGGS:

- boiled eggs
- fried eggs
- scrambled eggs
- cheese omelets
- poached eggs
- soft boiled eggs
- eggs Benedict with no English muffin
- egg muffins
- egg frittata
- deviled eggs

MEAT IDEAS:

- beef
- lamb
- pork
- chicken
- fish
- shellfish
- lunch meats
- sausages

pepperettes
beef or chicken jerky
rabbit
ANY MEAT!

CHEESE:

curds
cheddar
swiss
mozzarella
cream cheese
brie
full fat cottage cheese
full fat sour cream
colby
goat cheese
marble cheese strings
monterey jack
ANY CHEESE!

butter
full fat mayo
mustard (ketchup is not allowed)
35% whipping cream
onions, garlic and lemon
avocado oil
coconut oil
erythritol in small amounts (but avoid if possible)
unsweetened coconut milk
coffee, tea, bone broth, cocoa powder
stevia

RESET RECIPES

BREAKFAST IDEAS

MOUThWATERING CHAFFLE RECIPE! GAME CHANGER!

- What is a Chaffle?
- The simplest definition of a chaffle is a waffle made with eggs and cheese - chaffle.
- Used for a bread replacement when making sandwiches, or made on the stove top as a wrap for sandwiches.
- After you have finished the 4 week reset there is no limit to your imagination of what chaffles can be made into, the possibilities are endless - like pizzas, buns for hamburgers, pancakes etc.

BASIC CHAFFLE RECIPE: (RESET WONDER BREAD)

INGREDIENTS: -yields 2 chaffles:

-1 large egg

-1/2 cup of finely shredded mozzarella

DIRECTIONS:

-make in a mini-waffle maker

-preheat waffle maker

-whisk together the egg, cheddar and almond flour

-spray the waffle maker with a little extra virgin olive oil and place 1/2 of the chaffle batter on top of the waffle maker

-close the lid and let cook for 2-3 minutes

-take out and enjoy-its that simple!

CHAFFLE SANDWICH

-place whatever meat, cheese, mayo, seasonings in-between the 2 chaffles and make a sandwich.

CHAFFLE PIZZA

-add pepperoni or whatever meat you like with cheese and
-bake in pre-heated oven at 375° for approximately 5-7 minutes or desired consistency
sorry-no sauce added when on reset

CHAFFLE WRAP

-pour batter into frying pan
-fry up to personal desired consistency
-place place and cheese and roll up
-enjoy

GROUND BEEF, EGG AND CHEESE BREAKFAST CASSEROLE

INGREDIENTS:

-1 pound lean ground beef
-2 teaspoons dried sage
-1 1/2 teaspoons dried basil
-1 1/4 teaspoons salt
-1/2 teaspoon onion powder
pinch of crushed red pepper flakes (optional)
black pepper to taste
1 1/2 cups grated cheddar cheese
8 eggs
1 1/2 cups cream
1 teaspoon ground mustard

DIRECTIONS:

- place oven rack in the centre position of the oven
- preheat the oven to 350°F
- lightly grease a 9 x 13" baking dish
- in a large pan on stove top -medium heat- add the ground beef and cook until no longer pink
- in the meantime mix the sage, basil, salt, onion powder, red pepper flakes and black pepper in a small bowl and combine
- once the meat is done cooking, drain the grease from the pan and stir in the spice blend
- remove the pan from the heat and allow to cool for a few minutes
- spread the seasoned meat in the prepared baking dish
- sprinkle the meat with the grated cheddar in a large bowl
- whisk together the eggs, cream, mustard powder until well combined
- evenly pour the egg mixture over the beef cheese in the dish
- bake for 50 minutes until the eggs are puffed and golden brown and the centre is set
- allow to sit for five minutes before slicing and serving

PROTEIN PACKED HAM AND CHEESE EGG CUPS

INGREDIENTS: can be made for any amount that you need:

- 12 slices ham
- 1/2 cup cheddar cheese
- 12 eggs
- salt to taste
- freshly ground pepper
- parsley for garnish
- can also be made with only one or two eggs

DIRECTIONS:

- preheat oven to 400F
- grease 12 cup muffin tin (or how many you need to make)
- line each cup with a slice of ham and sprinkle with cheddar cheese
- crack an egg into each ham cup and season with salt and pepper
- bake until eggs are cooked through usually 12 to 15 minutes
- remove from oven and enjoy!

BUNLESS BACON AND CHEESE

INGREDIENTS:

- 2 large eggs
- 2 tbsp water
- 1-2 slices bacon cooked then halved
- 1/4 cup shredded cheese of your choice

DIRECTIONS:

In a medium non-stick pan, place 2 mason jar lids (with their centre removed) melt butter and spread over entire pan and place on medium heat.

Crack eggs into the centres of the lid and gently whisk with a fork to break up yolk.

Pour water around the lids and cover up the pan with a lid cook and let eggs steam until whites are cooked through takes about 3 minutes.

Remove the lid and top one egg with cheese

Cook until cheese is slightly melted - about 1 minute

Invert egg bun without cheese onto a plate

Top with cooked bacon or sausage

Top with the cheesy egg bun, cheese side down

When finished the 4 week reset mashed avocado can be added along with other low carb toppings

BREAKFAST SANDWICH

INGREDIENTS:

2 sausages patties

1 egg

1 tbsp cream cheese

2 tbsp sharp grated cheddar

salt, pepper to taste

DIRECTIONS:

-in a pan over medium heat cook the sausages and set aside

-in a small bowl with cream cheese and the sharp cheddar microwave for 20 to 30 seconds until melted

-mix egg with seasoning and make a small omelet

-fill the omelet with the cheese mixture and assemble a sandwich in between the 2 sausages

BREAKFAST ROLL UPS

-10 eggs
1/2 pound ground sausage
10 slices mozzarella cheese
salt and pepper to taste

DIRECTIONS:

-in a pan cook sausage thoroughly and add eggs
-scramble eggs together with the sausage
-stir until cooked and set aside
-place parchment paper on a cookie sheet and place mozzarella cheese slices on top
bake cheese in oven at 325° or until edges starts to brown
remove cheese from the oven and allow to cool down
divide the sausage and eggs evenly among the slices of cheese and roll up

OPTIONAL:

-lightly grease a pan with butter and cook until crunchy if desired

CLASSIC BREAKFAST BACON/SAUSAGES/ HAM AND EGGS WITH MELTED CHEESE ON TOP OF THE EGGS!!

CHAFFLES BENEDICT

A classic eggs benedict using cheesy mini-waffles instead of english muffins

HOLLANDAISE SAUCE

INGREDIENTS:

- three large egg yolks
- 1 tsp lemon juice
- two pinches of Himalayan salt
- 1/4 teaspoon Dijon mustard
- 1/2 cup salted butter

CHAFFLES BENEDICT

- 12 large eggs divided
- 1 cup shredded cheddar
- 8 slices bacon

DIRECTIONS:

For the Hollandaise Sauce

- put the egg yolks, lemon juice, Dijon mustard and salt together in a stainless steel bowl and vigorously whisk until the mixture is thickened and double in size.
- melt the butter and allow to cool
- place the bowl over a sauce pan containing barely simmering water or use a double boiler
- the water should not touch the bottom of the bowl

- continue to whisk rapidly being careful not to let the eggs get too hot or they will scramble
- slowly drizzle in the melted butter and continue to work until the sauce is thickened and double in volume
- remove from heat
- cover in place in warm spot until ready to use for the Chaffle Benedict

For the Chaffels

- heat up the waffle iron
- pour water in the bottom of your egg poacher pan and put it over medium high heat
- beat 4 of the eggs in a small bowl
- reserve the remaining eggs for poaching
- sprinkle a tablespoon of cheese onto the bottom of the hot waffle iron
- add about a tablespoon and a half of the beaten eggs being careful not to overfill -sprinkle another another tablespoon of cheese on top
- close the waffle iron and cook for about 2 to 3 minutes until golden brown
- remove the waffle repeat for all remaining egg and cheese
- you should end up with eight chaffles
- keep the finished ones in the oven on warm
- fry the bacon in a frying pan
- poach the eggs,
- remove from the heat to assemble
- place a slice of Canadian bacon on each chaffle then top with a poached egg and hollandaise
- sprinkle with pepper and serve

LUNCH IDEAS

GRILLED HAM AND CHEESE WITHOUT THE BREAD

DIRECTIONS:

- in a pan on the stove top lay slices of the ham
- on top of the ham place a couple of slices of cheese
- place another slice of thick ham on top
- fry up like a grilled cheese
- optional: make an egg omelet and place on top of the cheese slice

BASIC DEVILED EGGS

TIPS TO BOILING EGGS

- to help achieve the perfect result for making devilled eggs add a little bit of vinegar to the water while boiling the eggs to make them easier to peel
- try not to boil eggs longer than 10 to 12 minutes to avoid over cooking
- run cold water over or better yet place eggs in a bowl with ice cubes and water immediately after they are finished boiling

INGREDIENTS:

- 6 eggs
- 1/4 cup mayonnaise
- 2 teaspoons of yellow mustard
- salt and pepper to taste

DIRECTIONS:

- cut the boil eggs in lengthwise squeeze eggs to pop the yolk out of each half place all the yolks in a small bowl
- place the empty white halves on a platter with the open side up
- add 1/4cup of mayonnaise and 2 teaspoons of yellow mustard to the and mash everything together with a fork
- sprinkle salt and pepper into the mash
- spoon the egg yolk mixture and put a little into each of the white egg halves
- optional: after each egg half is filled sprinkle some paprika over them

MEATBALLS MADE IN BULK

INGREDIENTS:

- 2 pounds pork sausage
- 1 pounds ground beef, turkey or chicken
- 3 eggs
- Italian seasoning (or whatever seasoning you prefer)
- 1/2 teaspoon black pepper
- 1/2 pound shredded cheddar cheese

DIRECTIONS:

- preheat oven to 375°F
- mix all ingredients together until thoroughly blended, using hands is better than an electric mixer
- form into several dozen, 1-1/2 inch balls
- place on cookie sheet
- bake for about 25 minutes
- once cool they can be sorted into zip bags and frozen for grab and go

VARIATION- SCOTCH EGGS

-mould a bit of raw meatball mixture around a peeled hard-boiled egg and bake at 350°F for 30 minutes

-another variation- meatballs wrapped with bacon-just place 2 strips of uncooked bacon in a x shape in muffin tins and place a meatball also uncooked in the middle and wrap bacon around it 24

-bake at 375° until bacon looks crisp

CLOUD BREAD

INGREDIENTS:

- 4 large eggs
- 1/2 teaspoon cream of tartar
- 2 ounces cream cheese
- 1 teaspoon Italian herb seasoning
- 1/2 teaspoon Himalayan salt
- 1/4 teaspoon garlic powder

DIRECTIONS:

- preheat the oven to 300°F
- line 2 large baking sheets with parchment paper
- separate the egg whites and egg yolks
- place the egg whites in a mixer
- add cream of tartar and beat on high until the froth turns into firm meringue peaks then move to a separate bowl
- place the cream cheese into a clean mixing bowl beat on high to soft
- add the egg yolks one at a time to incorporate
- scrape the bowl and beat until the mixture is completely smooth
- add in the Italian seasoning, salt and garlic powder gently fold the firm meringue into the yolk mixture
- gently fold the firm meringue into the yolk mixture
- try to keep the meringue as firm as possible so the mixture is still firm and foamy
- spoon 1/4 cup portion of the foam onto the baking sheet
- spread into even 4 inch circles, 3/4 inch high
- make sure to leave space between each circle
- bake in the oven for up to 30 minutes
- the bread should be golden on the outside and firm

- the centre should not jiggle when shaken
- cool for several minutes on baking sheets
- cloud bread is good for sandwiches and toast with butter
- can make breadsticks with cheese on top
- can be stored in the refrigerator for several days but texture is best if eaten within 12 hours of baking

SUPPER IDEAS

LEMON PEPPER WINGS

INGREDIENTS:

- 4 pounds wings
- 4-5 lemons
- 3 tablespoons extra virgin olive oil
- season with salt and pepper

DIRECTIONS:

- position oven back to centre position
- preheat oven to warm lowest setting
- line large baking sheet with parchment paper and set aside
- to prepare the lemon pepper seasoning wash the lemons
- scrape lemon skin-(zest)
- spread the zest from the lemon peel in a thin layer on the parchment paper and place in the oven
- after 20 minutes, remove pan from oven and check to make sure zest is drying evenly
- return to oven until thoroughly dried approximate 25 to 30 minutes
- remove dried lemon zest from the oven and increase oven temperature to 425°F
- blend seasonings together
- in a large bowl combine chicken wings with the olive oil and the lemon pepper seasoning
- toss until evenly coated
- arrange seasoned chicken wings in a single layer on a rimmed baking sheet lined with parchment paper
- do not overcrowd

- place baking sheet on centre rack in preheated oven and bake for 20 to 25 minutes
- remove baking sheet and turn over chicken wings to evenly bake and place back in oven for another 20 minutes or until wings are browned and crispy
- remove and serve immediately

MELT IN YOUR MOUTH CHICKEN

INGREDIENTS:

- 1/2 cup parmesan cheese
- 1 cup mayo
- 1 tsp garlic powder
- 1 1/2 tsp seasoning salt
- 1/2 tsp pepper

DIRECTIONS:

- preheat oven to 350°
- in a medium sized bowl use your hands to cover the chicken breasts evenly with mayo
- lightly grease a baking dish with some oil and place chicken breasts into it
- sprinkle even amounts of shredded parmesan cheese onto each chicken breast
- bake for 40-45 minutes, parmesan cheese should be golden brown
- if you want to use a meat thermometer it should read 165° at the thickest part of the chicken

CHAFFLED TUNA CAKES

INGREDIENTS:

- 2 cans of tuna
- 1 egg
- 1 teaspoon minced garlic
- 3 tablespoons mayonnaise
- 1/2 teaspoon onion powder
- 2 tablespoons melted butter
- salt and pepper to taste

DIRECTIONS:

- drain the liquid off of the tuna
- place the tuna in a mixing bowl
- add the egg, garlic, mayonnaise, salt and pepper and mix together till well combined
- preheat your waffle iron
- use the melted butter to coat the hot iron
- divide the tuna mixture into 6
- place a ball of tuna mixture onto the centre of the greased iron
- cook until golden brown
- prepare recipe for chaffles and place on your waffle iron
- put the cooked tuna on chaffle and enjoy!

MARTIN CLINIC VITAMIN ALPHABET

1. VITAMIN A

As explained previously in this book Vitamin A is essential for your immune system:

THE EYES

- I call it the invisible shield -far more effective than the face mask they want us to use to help to prevent spread of COVID-19
- Vitamin A covers your nose mouth and eyes (the face mask doesn't cover your eyes) one of the ways you can be infected
- Vitamin A is not found in the plant kingdom

2. VITAMIN B12

I don't generally talk about all the other Vitamins B's- like a B complex. Eat your B Vitamins from the most bio-available source -eggs, meat and cheese a lot of people don't absorb B12- so take a sub lingual form and make sure it is a methylcobalamin and not just cobalamin

3. VITAMIN C

-coffee the true Martin Clinic Vitamin C!

Coffee is:

anti-cancer especially esophageal/ pancreatic and colorectal
anti-diabetic

anti-aging

One of my patients asked what about tea? I said why drink tea when you can drink coffee???

4. **VITAMIN D**

-remember the body is a human solar panel - every cell in your body requires Vitamin D

5. **VITAMIN E- EXERCISE**

-the benefits of exercise is legion

-anti-inflammatory

-anti-aging

-anti-cancer

-anti-diabetic (really helps with insulin resistance)

- increases nitric oxide

-helps your micro biome

-increases immunity

-decreases cortisol

-increases sleep quality

The Best Exercise

Any exercise is beneficial but here are the Martin Clinic recommendations:

15-20 minutes, 3x a week

short and intense

weight lift

6. **VITAMIN K**

-especially K2 found in butter/cheese, cheese curds the highest source

-takes calcium out of your arteries and moves calcium into the bones where it belongs

-remember K1 found in plane kingdom - that thins your blood

-K2 is what you really need

7. **VITAMIN O**

-Omega 3 especially high DHA oil is brain food/ anti-cancer/anti-aging

8. **VITAMIN P - PEANUT BUTTER**

-because I like it!!!

-has some Vitamin E in it

9. **VITAMIN R - REST**

-you need sleep-the biggest factor in lack of sleep which affects approximately 70% of population is high cortisol due to stress

10. **VITAMIN S - STEAK**

-there is no better food on the planet than a steak- the most nutrient dense food

-steak has everything in it so you can live on Vitamin S

*liver is good too but I don't like the taste so it didn't make the Martin Clinic list.

11. **VITAMIN W - WATER**

-70-80% of the population is dehydrated

-better than aspirin to prevent heart attack

-the best water is mineral water - spring water

2 liters of water a day or 64oz can decrease colon cancer by 45%

-2 liters of water a day or 64 oz can decrease bladder cancer by 50%

-2 liters of water a day can decrease the chance of a fatal heart attack by 54%
